

Main Screen

How NES – Professional works

To summarize, your body has energy continuously moving through it which produces a Quantum Electro-Dynamic Field. This field has structure, which we have termed “the human body-field” and consists of lots of magnetic vectors (signposts), which are able to direct sub-atomic particles within your body. This therefore acts as the body’s master control system above and beyond that of the traditional biochemical system. The QED field information is then carried via sub-atomic particles to the computer, where NES – Professional will then compare the client’s body-field with that of the only optimal map of the human body-field stored within the software. It then displays any differences it finds between the optimal map of the human body-field and your client’s through using a client friendly graphical user interface.

Where does the energy come from that power The Human Quantum Electro-Dynamic Body-field?

A field is created when energy moves from one point to another, and collapses when the movement of energy ceases. So for a field to exist, it must have energy, where does the energy come from that sets up the QED body-field?

Our research indicates that there are three main energy systems that contribute towards the energy of the Body Field. The heart powers the first of these systems. The pressure waves induced by the beating of the heart create both phonons, and real sounds, which can be connected to the system of quantum energy.

The second energy system is created by the nervous system. The nervous system creates sounds in a similar way to the heart and huge amounts of ionized particles. It also devotes a large amount of effort to the creation of a polarization wave, which can act as a carrier for the quantum information in the accompanying field.

The third way of generating energy for the Body Field comes from the lungs. Tibetan Yogis have known for centuries that they can generate heat in the body by breathing in a certain way, or producing a certain sound.

The Map of the Human Body-field

The Body Field’s (like your aura but imagine it extending internally) structure however is split into 12 main energy compartments (or structures), which provide the zero-energy pathways for information transfer to the relevant cells in the body. In fact it is DNA itself that supplies the framework for the transfer of information in the body, which is also split into 12 main sections. This also links to how the 12 main groups of Meridians are able to communicate information through the body and the cells in the relevant area are able to pick up information from the framework of DNA in the cells. These 12 compartments of energy power also correlate with some of the recent breakthroughs in quantum physics are ultimately related to how matter at the quantum level is structured itself.

This idea can be observed in nature. For one example, next time you are near any stalactites, have a closer look at them. You will see that every single stalactite, no

matter how young or old, big or small, has followed the same energy compartment during its growth, and has a 720° Twist from top to bottom.

The Optimal Map of the Human Body-field

It has taken 25 years to be able to work out how to construct a model of and then to read information from this map of the optimal human body-field. However the reason it is useful is because it is responsible for directing all sub-atomic particles within your body. In other words it controls information transfer or communication within your body. It therefore acts as the master control system for all metabolism and growth over and above the bio-chemical control system. Since it is a field, it can be read.

You may ask how can there be an optimal map as we're all different. Yes we are and we were all born with slightly different body-fields, but the main structure of the 12 main energy compartments and the structure of information contained within each one is identical and it is this structure that makes up the map. The structure of the body-field is what directs sub-atomic particles to their correct function in the body. If the structure and hence cellular instructions are wrong, ill health results.

NES – Professional compares your body-field to The Map of the Human Body-field stored on the computer

NES – Professional therefore compares the structure of sub-atomic particles (such as photons and electrons) from your QED body-field with the magnetic vectors which make up The Optimal Map of the Human Body-field contained within the software.

But how can a system be created that can do this? – Quantum Entanglement

Luckily there is a curious property in physics called Quantum Entanglement which allows identical arrangements of sub-atomic particles to communicate with each other, but only if their structure is the same.

As mentioned earlier it was reported in June 2003 in New Scientist that researchers in Austria, led by Marcus Aspelmeyer, had successfully sent entangled photons across the river Danube without the use of optical fibers. Quantum entanglement is a property that allows two particles to behave as one, no matter how far apart they are. Measuring the state of one particle instantaneously determines the state of the other, just as proposed in the EPR paradox. Therefore, highly complex scientific evidence has mounted up in support of the idea of quantum interconnectedness in the universe.

Other examples abound including Cooper Pairs of electrons in super conducting metals. The Nobel Prize winning BCS theory of super conductor's states that in a super conducting metal, pairs of electrons are coupled over distance, due to interactions with the crystal lattice that they are travelling through. In other words they share the same structure and can therefore communicate to each other over distance.

So the main challenge that produced NES – Professional was to produce within the system something that mimicked exactly what occurred in nature or in other words

to make sure the structure was identical so that information could be transferred efficiently between two Quantum Electro-Dynamic Fields. In other words we have mimicked the optimal body-field inside the computer, which shares exactly the same structure of a human body-field.

As mentioned earlier you need energy for a QED field to be set up and to interact with, it probably does not take much imagination to realize a computer through its constant on/off switches is continuously producing a QED field of which other QED fields can interact with.

Computer interaction research

As previously mentioned more than a decade of research from groups such as the Princeton Engineering Anomalies Research program (PEAR) has shown that there is an interaction between the human consciousness and technological systems. The research of Brenda Dunne and Robert Jahn in particular has verified the hypothesis that random processes can be influenced significantly through human consciousness. There are also now a number of computational devices that works using this principle however due to no understanding of how the body-field is structured they are limited in the repeatability and accuracy of their results. We can now explain how these work, by saying that there was an interaction between the two QED fields produced by the human and that of the random event generator inside the computer whenever a matching structure was present (i.e. at that point Quantum entanglement caused a transfer of information). It does answer some questions as to what consciousness really is....but that's another story!

What does the actual device do?

The device simply connects the two QED fields set up by the client and the computer. Think of it rather like an antenna, providing an extra pathway for electrons and photons to carry information between the two.

Correcting the Body-field

The Body Field is powered by twelve main interlocking fields and is then divided into twelve main self-organizing sections. NES-Professional and remedies that we have created are designed with one task in mind:

To restore proper communication within the Body Field

There are two main issues connected with restoring beneficial communication within the Body Field:

- 1. Providing enough energy to power the Body Field effectively.** Without sufficient energy communication is diminished. The energetic drivers have been designed to provide energy to the twelve interlocking fields that create the overall Body Field. Once the Body Field is powered effectively, communication is enhanced and the body's own healing responses begin to bring the Body Field back into balance.
- 2. Ensuring the Body Field is structured correctly.** Although the Body Field is powered by twelve interlocking fields, it also organizes itself into twelve main sections which relate back to Traditional Chinese Medicine and the structure of DNA. In other words, these twelve energy compartments activate the fields of the body cells, providing an environment for them to work

effectively. In other words, the information for the large body field resembles closely that for each cell. For a perfect expression (between genetics and other energetic influences) to occur, each section of the Body Field needs to be structured correctly. The Energetic Integrators have been designed to enable the correct structuring of the twelve main energy compartments and the information contained within

By correcting the Body-field, client's will experience a variety of benefits including mental clarity, improved health, a sense of inner calm, and life changes. This occurs due to normal physiology returning, cellular toxins being excreted better, enzymes and hormones meeting their targets better, protein folding being correct and transfer of information between proteins being improved.

How NES-Professional should be used

The first step on the route to reaching a perfect Body Field is through the use of NES-Professional. Our groundbreaking system has been specially created in order to identify any deviations in the user's Body Field from the ideal map. These deviations can then be addressed by the use of the Nutri Energetics remedies, which have been created especially to interact and correct the Body Field in order to restore normal functioning.

It is important to note that the program is not a 'quick fix'; rather it is a series of steps, meant to be carried out regularly over a period of time. The deviations in the Body Field can be thought of as occurring in layers, and the use of the system and the remedies can be considered as 'unpeeling' the layers of problems one at a time. With the removal of each layer, the Body Field becomes closer to the ideal structure, and the user achieves improved health and emotional well-being.

Another analogy is to relate the correction of the Body Field process to discovering an iceberg. The tip of the iceberg can be compared to the symptoms that you are currently experiencing, however there are a whole load of structural defects that have been caused by various shocks that are hidden under the surface. Our health program has been designed in such a way to "melt the iceberg" from the top down. Therefore, it recommends the remedies more strongly associated with your current symptoms and as these are resolved, the software will more strongly recommend the next layer and so on. NES – Professional is not based on any conventional diagnostic methodology, it is purely designed in the best manner possible to get people healthy again. When the base issue has been resolved, the path is clear to an ideal Body Field and vast improvements in both health and emotional terms.

The bottom layer of the iceberg is normally caused by some type of major shock, whether emotional, physical, environmental or genetic. Based on extensive research, we advise that corrections for these shocks are most successful after time has been spent realigning the overall Body Field. Therefore, we recommend that during the first three months of following this program, the user should concentrate on taking the overall field aligners, before moving on to the original shock correctors.

The order in which the Body Field should be analyzed and corrected and the parts of the body that are being targeted in this program will be discussed in detail in the following chapters. However, the idea is to work your way down from the tip of the iceberg via the Nutri-Energetic Systems software, and the correcting remedies. These remedies are divided into two main groups:

1. Overall Field Aligners

(a) The Big Field Aligner

(b) Energetic Drivers (12)

(c) Energetic Integrators (12)

2. Shock Correctors

(a) Genetic

(b) Musco-skeletal

(c) Emotional

(c) Nutritional

(d) Environmental

(e) Pleomorphic Organisms

(f) Allergic

Interpreting and Using the System

Information is carried in the structure of the electron. The electron should be thought of as a wave function, rather than as a particle. The yellow bars are an indication of the position of where each test exists on this wave function. Rather like a radio antennae getting the best signal when it is half the length of the radio wave, when a part of your body-field is half the length of it's wave function, it is normal. When it's position on the wave function is wrong, your body-field is distorted. All that is needed to know for treatment purposes is to pick the most significant readings away from zero. We are doing further research into the interpretation of the negative and positive parts of the wave and it's relation to the left and right hand side parts of the body-field, however until this has been fully assessed for the time being we recommend that you just take note of the size of the deviation away from normal.

Recommended Remedies

The bottom of the Main Screen displays the recommended remedies. It is divided into two sections. The Left hand side gives an overall summary of which remedies we think should be recommended to your client and the Right hand side shows the recommended Energetic Integrators.

So the easiest way of using the system is to just use the remedies recommended on the Left hand side as this takes into consideration all of the remedies on all of the screens.

This summary is not only based on the most relevant items in a particular layer, it is also based on how many tests and hence remedies they would have had. As a practitioner you have the choice to disregard this and recommend remedies straight from individual screens if for example you wish to get a particular effect rather than following our guidelines.

The summary follows a fairly simple treatment methodology.

- i) First few visits increase the Energy of the body-field with the Drivers and Big Field Aligner.
- ii) Secondly treat with the most relevant include Drivers, Big Field Aligner and the Energetic Integrators

iii) After many visits, the summary will recommend out of all possible combinations of remedies.

The reason we have done this is because in that order you are more likely to give your client more energy and hence feel better quicker. Energy is needed so that it is easier for the body-field to overcome some of the initial shocks that caused the problems in the first place. However as a practitioner feel free to experiment with different treatment orders, no harm will come from using them out of the order we have suggested.

.....

The main screen is the link to your client's body-field. From the graphical interface on the left hand side you are able to navigate to any part of the body-field that you wish to view and gives an overall picture of the state of your client's body-field as it is now.

The Left hand column gives a summary of all the other screens, so you are able to see which ones are more important to look at. Double Clicking on each bar graph will bring you to each subsequent screen and single clicking will bring up the appropriate help file for that particular screen.

Interpreting the bar graphs - What matters is it's deviation away from the middle (or 0). So a half filled yellow bar graph indicates a normal reading. The absolute values are not so important and neither whether it is + or -. What matters are the most significant readings. The most significant we have colored red.

The main graphic gives an overall representation of the body-field. The stronger the yellow aura around the edge, the more energy there is that is powering the body-field. The 12 different sized circles down the middle of the body, represent how well the 12 Energy compartments of the body-field are structured. The larger and more yellow the circle, the better the structure. The 12 Energetic Integrators have been designed to restructure the 12 Energy compartments back to normal and as such are the most important remedies to use alongside the Energetic Drivers. The Energetic Integrators are remedies, which provide the correct information for the structure of the 12 main energy compartments of the Body Field. For more information please read the book, "The Unturned Stone".

We recommend using about 2 Energetic Integrators at a time (the most significant), however up to four types daily can be used (in fact some of the shock adjusters are combinations of four Integrators). These can be mixed altogether in water although it is slightly better to take them 10 minutes apart. It is perfectly acceptable to recommend the Energetic Integrators straight away, in which case take them separately to the Energetic Drivers (such as in the evening or on a separate day). We have however in the software recommended that people take Drivers first to raise their overall energy and to avoid taking too many remedies at once. The recommended dose is 9 drops, with more sensitive people taking less.

Out of the whole Nutri Energetics Health System, the Big Field, Driver and Main screen are the three most important screens to use and look at.

The Remedies recommended on this page have been worked out from all the other screens and therefore the main screen should be considered as the most important screen of all.

The Energetic Integrators

The Body Field is split into 12 main energy compartments (or structures), which provide the zero-energy pathways for information transfer to the relevant cells in the body. In fact it is DNA itself that supplies the framework for the transfer of information in the body, which is also split into 12 main sections. This also links to how the 12 main groups of Meridians are able to communicate information through the body, the cells in the relevant area are able to pick up information from the framework of DNA in the cells. These 12 compartments of energy, DNA and TCM also correlate with some of the recent breakthroughs in quantum physics, and as such, are ultimately related to how matter at the quantum level is structured.

This idea can be observed in nature. For one example, next time you are near any stalactites, have a closer look at them. You will see that every single stalactite, no matter how young or old, big or small, has followed the same energy compartment during its growth, and has a 720 degree twist from top to bottom.

In other words, each Energetic Integrator represents the structure of a part of DNA. Within the Energetic Integrators, and indeed within all of our remedies, information is carried on a quantized wave. The structure and hence nature of this quantized wave is determined by the DNA. However they do not actually occupy the same space as every single spin of one real particle is accompanied by a double spin in quantum. So for every 360 degree spin of DNA, we get a 720 degree spin of the quantized structure. The body manages information by storing it within spatial memory. Imagine it a bit like a corkscrew and that any part of the corkscrew with the same angle are able to communicate to one another (in other words if they have the same spin).

What do the Energetic Integrators and structure of DNA have to do with ill health? Most of us are very familiar with the shape of the DNA double helix, and understand that it is a continually rotating strand of nucleic acids. Every compartment is able to rotate by 720. Different types of quantized information are carried at various degrees of spin within the compartment, starting from nutritional mineral information and ending at pathology. It is interesting that all pathology (i.e. illness) is found above 660 degrees spin, and that this is where the quantized wave begins to break up before starting afresh at the next compartment (0 degrees spin). In practice, this means that if the structure of the quantized information below 660 degrees spin has been distorted (e.g. by genetic damage through environmental factors), it leads to a break down in the wave function above 660 degrees. When the wave begins to break up, there are major distortions of information, leading to pathology or disease.

The Energetic Integrators, therefore, help to stabilize the quantized wave, or energy compartment, to greatly reduce the breakdown of stable information above 660 degree spin. The health benefits of the Integrators should therefore be obvious.

DNA communicates information to the cell via the various organelles (structures within the cell). The structures of each of the 12 Energetic Integrators are strongly related to the structures of these organelles and are, therefore, able to help with information transfer within the cell. A list of the Energetic Integrators and their corresponding organelles can be found at the end of this chapter.

Therefore, the Energetic Integrators provide the base structure for ensuring that communication and information transfer is optimized within the Body Field. The other remedies (e.g. emotional, pleomorphic and environmental) are all specific sets of quantized information within one of these compartments and, as such, will show maximal results when a correction has first been made to the main structure of the energy compartment.

Some of you may read this and ask if DNA can really be repaired and if it can how much damage can be reversed? DNA does get breaks and errors in it and there are repair enzymes for DNA, indicating that this is possible. However we are not claiming that we are repairing DNA rather that we are changing the shape of the information carried in space, which has been generated by the real DNA envelope. Human DNA damage is a fact of life in modern industrial society, with birth defects increasing as damaged DNA is passed on. If the information surrounding DNA is improved, normal physiology may return, cellular toxins maybe excreted better, enzymes and hormones may meet their targets better, protein folding maybe correct and transfer of information between proteins maybe improved.

All therapies, such as homeopathy, acupuncture and herbalism, indirectly carry quantized information that is picked up indirectly by cells through a section of their DNA. An analogy is to think of DNA (through the quantized wave) as a radio antenna that can transmit and receive information. The major difference between our remedies and other forms of treatment is that we can give precise information directly to DNA, and hence the Body Field, enabling people to achieve perfect health. Instead of sending a number of messages and observing the effects hoping for a positive reaction, as in the case of homeopathy, we have worked out the correct structures and quantized information for ideal health, and only give these messages.

Big Fields

The first level of your Body Field that the software examines is that of its interaction with the Big Fields. This relates to the basic, overall way in which the Body Field is placed in the fields created by the Earth. If the Body Field is misaligned or distorted within the Big Field, then this is the first problem that should be addressed before healing can occur. For simplicity's sake, the Big Field can be thought of as consisting of three axis: the equatorial, the vertical and the magnetic polar, which all interact with the Body Field. In complex Big Body Field errors, the three axis of the body are all found to be considerably shortened or lengthened and would prevent correct reading of the Body Field. However, deviations between the Big Field and the body are easily rectified by use of the Big Field Aligner. This remedy is able to correct any misalignments present in any of the three axes. More information about the three axes, and the effects that errors in them can cause, can be found by clicking on each of the relevant bar graphs.

We recommend that if any of these Big Field errors occur in the first treatment session then the Big Field aligner should be used (6 drops per day) alongside whichever Energetic Drivers that also come up (found on the Drivers screen).

The Vertical Axis

The vertical axis is connected with gravity and its effects on the body. This is an area that NASA is currently investigating, in order to enable the human body to be able to withstand longer periods under low gravity. For those of us still on earth, this axis is associated with effects of geopathic stress. For example, effects can be observed in the Body Field that are mediated by the nearby presence of underground water, caves far below the earth, or even ore or oil deposits. These things can significantly affect human health over a long term. They have been used to explain why some places on earth are healthier to live in than others, a science well understood by pre-industrialized people.

In addition, there are slight variations in gravity from place to place. These are not substantial, but there is an effect involving gravity interacting with other energies, which can affect the Body Field. In certain people, these geographical variations in gravity can have a noticeable effect on their Body Field. Problems, which can be linked with the vertical field are usually found in the function of the nervous system, and can affect sleep patterns. Additionally, if your health varies a lot depending on whether you are upright or lying down, then a defect in the vertical axis may be the reason why.

The Magnetic Polar Axis

The iron core inside the earth sets up the earth's polar magnetic field, and this results in a huge field that reaches way out into space called the Van Allen Belts, discovered decades ago. Naturally all living things respond to this magnetic field, which is found at 90 degrees to that created by gravity. When there is an abnormality connected with this field, there are changes in the processes by which the body creates and distributes heat. If you have hot and cold regions randomly located about your body, then there is an error in the magnetic polar axis.

The Equatorial Axis

This axis is placed at 90 degrees to the north-south axis, related to the poles of the earth. The Chinese, who also incorporated it into their scheme of traditional medicine, discovered polar magnetism long ago. They understood that the body is but a mirror of the earth, a poetic way of saying that we are affected by the environmental energies. The idea of an east-west energy or equatorial energy relates to the idea of paramagnetism in physics. That is, some substances, which are not iron based, show a reaction to magnets. The effect is called paramagnetism, and not only relates to the soil where the concept is used in agricultural measurements, but also to the body. Low quotients for paramagnetism indicate that the body is not able to absorb the right trace minerals from the food via the soil.

This part of the Body Field is also related to the way in which the body responds to electrons and ionic charges. In terms of health, this is connected with the way in which the body carries out its daily tasks – the technical term being physiology. It particularly affects metabolic diseases as it is concerned with the reactions in the

body that involve the elements hydrogen and oxygen. Oxidation and anti-oxidation are related to ageing as well as the processes of physiology. Anti oxidants are needed by the body at all times, night and day, to compensate for the stresses involved in the daily house-keeping of the body. Communication affecting metabolism, the liver and the large bowel will be most affected by errors in the equatorial axis.

Big Field Aligner

There are a number of external fields that originate in the earth that can have detrimental effects on the human Body Field, leading to stretches and contractions of the different axis of the field. This bar graph gives a summary of your need for the Big Field Aligner which is able to supply the correct information to the Body Field to return all axes to their accurate lengths, and opens the way to further healing.

Polarity

The first thing to do in correcting the body field is to correct polarity - something that refers strictly to an electro-magnetic field. The Quantum field makes huge changes within itself simply by having a negative charge, and a left hand spin.

Take the Polarity remedy 6 drops a day until bottle runs out.

The Energetic Drivers

For the Body Field to work correctly, it needs to be properly powered. There are twelve organs that can be related to the creation of energy within the body, and their job is to activate yet even smaller fields. These twelve drivers of the internal Body Field can be subdivided into The Source Energy, three macro-drivers and then eight micro-drivers.

The first organ to begin to work, and hence generate energy within the internal Body Field, is the brain. The development of the brain is able to activate the energy field associated with the nervous system. This is closely followed by the development of the heart, which in turn promotes energy to activate the blood system. The respiratory system is the next to develop, which is driven by the lungs, which begin to work at birth. In TCM, the Chinese believe that the lungs are responsible for pushing energy through a system of conduits called Meridians. This concept can be related to the internal Body Field through the notion that all types of connective tissue present in the body are able to respond to information and energy provided by the lungs. These three organs, the brain, the heart and the lungs, supply the energy to create the three macro-fields that are part of the internal Body Field.

The eight micro-drivers of the internal Body Field are related to the energy and fields created by the stomach, the muscles, the skin and the cells of the body. After we begin to breathe, the next energy source to begin work is the stomach and large bowel. This provides the source of nutrition to the body after the umbilical cord is cut. We are able to change direct nutrition from the blood into a source of energy via the stomach and large bowel. The muscle and skin systems of the body then develop. The muscle system is involved in the correct functioning and movement of the body. The skin, being the largest organ in the body, performs many tasks, one of

the most important involving respiration and excretion of unwanted products from the body. The cell micro-driver of the internal Body Field is the body 'housekeeper', the field produced by the cells of the body, and created by the mitochondria contained within each cell. These mitochondria are the driving force behind the energy in cells, and are also able to tidy up the cell after energy has been created.

If any of these organs are generating insufficient energy, and hence, substandard fields, then this can lead to ill health and emotional problems. These twelve drivers are affected by a number of factors including stress, pollution and emotional shock. Use of the software is able to detect problems in these fields, and allow suggestion of the relevant Energetic Driver remedy to help the Body Field to realign and return to the ideal.

Preferred Order of use of the Energetic Drivers (however they still work out of order):

The Source

Macro-Energetic Drivers

1. Nerve Driver
2. Heart Driver
3. Lungs Driver

Micro-Energetic Drivers

4. Stomach Driver
5. Muscle Driver
6. Skin Driver
7. Cell Driver
8. Liver
9. Kidney
10. Immunity
11. Pancreas

Dosage of the Energetic Drivers

First session of Drivers:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to

tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

The Source Driver

This is very commonly needed in therapy, since it provides energy for all the other energy Drivers, and is the source of the dynamic energy of the body. If you like, it is the Driver of the Drivers, and needs to be corrected before all other Drivers.

The idea of this remedy comes from Traditional Chinese Medicine, where the idea of Yuan Qi , or source energy is well developed. They thought that all twelve of the main Meridians (which are related to the Energetic Integrators in this system) can be fed by a source energy, derived from breathing and the energetic function of the Kidney Meridian. Their idea is that the lungs work with the kidneys, a Meridian that goes right through the surface area of the lungs, to create another energy, and as it probably does not have a chemical equivalent, and it is purely a bio-energetic concept. A replica of The Source energy was made during our research, and it was found that all twelve Energetic Integrators responded to this energy. Over 1500 years, the Chinese physicians noted that the source energy could be depleted by drug taking, bad living and even by chronic disease.

The Source Driver is for those who breathe poorly and those with long term debilitating illnesses, and for pure exhaustion caused by years of sickness. The catch 22 of all energetic treatment is that you have to be healthy enough to make energy before the treatments will work. The Source Driver has been designed to provide this energy.

Those with a lack of Yuan Qi (Source Energy) will have sore hips, a bent back and shallow breathing, and even pains in the lower back, and even a lot of inflammation of the mucous membranes all over the body. These symptoms are a good guide for who will benefit most from the Source Energy medicine.

Our testing of this new remedy has revealed some interesting results. This Source energy is not used for removal of environmental toxins, but appears to be useful for the neurotoxins found in gout and is related to the following symptoms:

In summary, the most important use of the Source Energy is in older people with threatening circulatory diseases affecting the heart brain and lungs. It is the Driver of Drivers.

Dosage: Up to four times a day, for those who are really exhausted, at the rate of 7 drops each time. The maximum dosage per day is 28 drops.

Nervous System Driver

The nervous system begins to make low frequency sounds even before birth. After birth it is additionally responsible for producing many complex electrochemical signals and patterns, including brain waves. These natural sounds and patterns create fields that transfer data throughout the body and between sections of the brain. These fields vary over the course of the day and night, and depend on whether you are doing tasks or resting. It has been shown that brain waves during sleep or deep relaxation are extremely different to those relating to other sorts of

behavior. The waves generated during sleep are known as delta waves and have very low energy. The waves with the next highest energy are called alpha waves. It is on these waves that the Nervous System Driver is based.

The western population of today is generally over-stimulated and mentally over-active. The way to restore balance and promote mental balance is by calming down. Therefore, reminding the body how to correctly produce alpha and delta waves is pivotal. The Nervous System Driver has been designed to correct the alpha and delta wave forms produced by the brain, in order to promote a feeling of calmness and aid restful sleep. These alpha and delta waves also contribute to the energy that drives the field to set up the rest of the nervous system, and therefore their correction could lead to a number of other improvements in health and wellbeing as well.

Nervous System Driver can be enhanced by using the Big Field Corrector. Nervous System energy fields do not function well with the following pollutants of which this driver has been designed to help remove:

Butanols – hydrocarbon solvents
Chlorpyrifos – organo phosphate
Heptane – solvent
Diphtheria vaccination (S, A, R)
Rabies vaccination (S)
Tetanus vaccination (A, R).

Nervous System Driver may be used for delayed development of children once over the age of 4.

If the analysis software has recommended a combination of drivers, then the Nervous System Driver should be used first.

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Heart Driver

The heart creates complex double sound waves, and has links to the lungs and parts of the nervous system. These complex sound waves, together with the impulses from the nervous system and the energy created from oxygen-interchange in the lungs, create the major template of the body-field.

The heart is a special energy driver due to its location at the intersection of three systems. Its involvement with the blood system is obvious as it provides the waves necessary to push the blood around the body. In addition, the heart receives nervous system impulses via two types of fibers, linking it with the brain energy driver. Lastly, the right and the left sides of the heart are linked via the pulmonary vein that also links the heart with the lungs – the organ that is the power source of the ancient Meridian system.

The Heart Driver assists with the maturation process of platelets.

If the energy driver of the heart is damaged, then the sounds of the heart, the pulse and general health may all be affected. Mentally, the emotions tend to dominate decision-making processes, rather than common sense. This correlates with the ancient Chinese view that the heart is the source of mental integration, rather than just a pump.

The heart, therefore, can be regarded as the energy driver for your sense of identity, confidence and ability to function as an independent adult. When damaged, self-esteem can drop to low levels. Our research has shown that the mid brain and visual and auditory acuity are directly linked to the energy field of the heart. This connects with the Chinese view that your heart is not in order if you are scatty, disorganized or unable to experience joy.

The most likely causes of errors in the heart energy field are shock, stress, pollutants and secondary errors associated with the lungs and nervous system. In addition, within energetic medicine the heart has a special relationship with the stomach. Therefore, errors in the stomach field may cause secondary misalignments in the heart field.

Heart Driver can be enhanced by using The Big Field Corrector. Heart energy fields do not function well with the following pollutants of which the Heart Driver has been designed to remove:

4-phenylcyclohexene (carpet backing)
Dioxane industrial solvent
Measles-Mumps-Rubella vaccination

Heart Driver can be enhanced by using The Big Field Aligner. Heart energy fields do not function well with the following pollutants of which the Heart Driver has been designed to help remove:

Butanols, hydrocarbon solvent
Asbestos, from car brake linings
Vaccinations for Influenza (S,A) Polio, BCG, and Yellow Fever

The heart driver is also particularly good for hearing acuity and major learning difficulties resulting from autism (particularly linguistic ones).

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Lung Driver

The lungs transform oxygen from the air, causing movement of energy in every tissue of the body. The lungs also produce sound via the larynx, which activates numerous other energy fields within the body.

The majority of people who live in industrialized nations will have an accumulation of drifts of sprayed chemicals from the countryside, carbon monoxide, PCBs and lead in their lungs, alongside cadmium and other heavy metals. The Lung Driver remedy has been designed to reactivate the various isotopes of oxygen that are needed to fuel the major mechanism of metabolism – the exchange of gases in the bronchioles. Many viral diseases are thought to flourish in an environment that is oxygen deficient, therefore, this Driver can be used to help combat viral diseases.

The frontal lobes of the brain cease to function correctly when infected with large amounts of heavy metals from the atmosphere. The field produced by the lungs is related to growth, development and the ability to breath correctly. Additionally, it can be connected to the higher mental skills learnt by children, and higher conscious levels developed by adults.

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Stomach Driver

Slow contractions in the stomach as well as the bowel are responsible for creating some of the energy in the stomach field. The electron transfers involved in the many reactions that take place in these organs, however, generate the majority of energy. The stomach and bowel lining actually produce an energy field by absorbing minerals, proteins, fats and carbohydrates. The brain uses most of the resulting blood sugar to help us to formulate our thoughts. Many polluted foods can upset the process of field creation, leading to the breakdown of mental functions. Additionally, this field enhances our ability to increase muscle stamina.

The Stomach Driver assists with the maturation process of granulocytes and basophils.

The means of food production in the western world today gives rise to the fact that practically everyone eats polluted food at some points in their lives. Therefore, it can be assumed that the lining of most people's stomachs end up with a huge number of foreign chemicals embedded in them. Some chemicals that are widely used in the agriculture industry take up to 20 years to break down in the soil and cause havoc in human physiology.

A detoxing effect is created on ingestion of this remedy, and symptoms of mild nausea may be experienced. However, these will cease after a short time. If there is a strong action caused by this Driver, then it will help to use the Emotional Stress Release to ease the situation. This will rectify any detoxification reactions within one treatment. Low doses are recommended of this Driver due to the presence of so many foreign chemicals in the Stomach lining. This Driver is also used in the treatment of dyspnoea, and all chronic chest conditions.

Stomach Driver can be enhanced by using The Big Field Corrector. Stomach energy fields do not function well with the following pollutants of which the Stomach Driver has been designed to help remove:

Fungicides
Electromagnetic radiation
Heavy metals Antimony, Cadmium, Lead and Arsenic
Hepatitis A and B vaccinations

it also helps to combine the Stomach Driver with treatments for heavy metal

intoxication of the lining of the gastro intestinal tract. (Use Heavy Metal Detoxification remedy)

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Muscle Driver

A field is generated when the muscles of the body extend and contract in every day physical actions. Errors can occur in this field when muscles are functioning incorrectly, or movements are blocked or uncomfortable. The Muscle Driver is designed to correct this field by removing any blockages caused by incorrect oxygen uptake, lead pollution or residues of common organisms. It may also boost the availability of common minerals, such as calcium and magnesium, to the muscle field.

Research has shown that this Driver may be able to improve muscle performance in cases where detoxification is required. It may also be able to provide benefits for sufferers of arthritis pains. In addition, there are emotional factors related to the muscle field, which can be addressed by the Muscle Driver.

This Driver is very commonly not functional. It can be used with the Big Field Corrector to enhance its effects.

Muscles and joints may actually ache more when chronic arthritis sufferers take the correction to the muscle field. The effect is overcome by stimulation of the Liver, with Field Integrator 8, and by increasing oxygenation using Field Integrator 2. This is the equivalent of stimulating Shao Yang Meridians in Chinese Acupuncture. The Muscle Driver is always used as an adjunctive therapy with arthritis and for treatment of specific joints.

Very commonly needed in therapy due to the prevalence of Cadmium salts in the stomach lining. This is a dynamic remedy that centers on the muscle functions, and is always a key part of neuro muscular therapy of any type. In bio-energetics there is

a strongly repeated idea, from psycho therapy developed from several sources, that the muscles actually contain physical memories of our lives. Hence the eradication or the bringing to the surface of these memories is a key part of many energetic therapies around the world. In fact many diseases can find their genesis on shock, where the muscle tissue of the body is the recipient. The success or otherwise of chemical medicines in the treatment of muscle diseases should act as a guide to the truth or otherwise of this statement.

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Skin Driver

The skin is the largest organ in the body, and it is therefore necessary to ensure that it is working optimally. One of its major tasks is involved with respiration and excretion of unwanted products from the body. The movement of molecular entities across the surface of the skin, via respiration and excretion, generates the skin energy field. As the skin is the most exterior organ, it also interacts with the vertical axis of the Big Body Field.

The Skin Driver may help with skin conditions, such as allergies, in addition to muscles problems in the underlying and interconnected muscles. In the case of skin complaints that are related to autoimmune errors, the Skin Driver should be taken in combination with Energetic Integrators 3 and 9.

This Driver's function is enhanced by combining it with Big Field Aligner, especially if there has been exposure to radiation.

It can also be used in sequence with Energetic Integrators 1 for Colon, 2 for Lungs, and 8 for Liver. It is not suggested that these be used all at once, but it is useful to use Skin Driver with each Integrator listed for a treatment period of 10 days each. Integrator 1 will assist the skin on the face, Integrator 2 for the body and Integrator 8 for the hands.

The Skin is the largest organ of the body, and so important that it actually increases in size as it needs to in older people. Its chief bio-energetic function is that of the removal of the toxins generated by living. The test as well as the remedies does not just refer to the skin, but also to the mucous membranes of the bowels and lungs. The Skin Driver will not affect asthma however. In Chinese Traditional Medicine, the link between the Skin and the Lung is quite important, indicating that better results can be obtained by using their Drivers together.

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Cell Driver

The cellular energy depends on very tiny structures called mitochondria, which are present in all cells in varying numbers. The Cell Driver has been designed to help the mitochondria in order to provide energy to the cells, so that all cells are able to perform their required activities correctly. These activities include the creation of heat, absorption of oxygen and the excretion of waste products.

The Cell Driver assists with the maturation process of mast cells.

Pollution and other environmental factors can destroy the ability of cells to function correctly. The Cell Driver, therefore, may facilitate normal cellular respiration and excretion. It is directly related to liver function, as this is the organ most concerned with metabolism and the clearing of waste products from the body.

Blood pressure elevation, gout and the presence of small joint arthritis can also be related to deviations from the ideal cellular field. This is due to the build up of toxins within the cells. This Driver combines well with various anti-oxidants, which are responsible for mopping up free radicals, in addition to having a strong anti-oxidant affect itself.

Cell Driver can be enhanced by using The Big Field Corrector. Cell energy fields do not function well with the following pollutants of which the Cell Driver helps remove:

Dioxins
PCPs
Xylenes
Electromagnetic radiation.

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Kidney Driver

The Traditional Chinese medical system has always had theories about the basic energies of the body, and there were several types of kidney energy which are supposed to fulfill his role.

Our research into the body field shows that there is indeed a kidney energy that is related to the function of the cells in the kidney – and hence to the fluid metabolism and blood pressure mechanisms of the body. The Kidney Driver assists with the maturation process of monocytes.

But the Chinese traditional doctors also insist that the kidney energy affects the cells and function of the brain, the stamina of the brain function, and the state of sanity itself.

A replica of the kidney energy – known as jing of various types in Chinese medicine, has been made and it fulfils the role suggested by generations of Chinese doctors. Many will be aware of the function of jing in martial arts, where as warm up exercises the kidney area of the lower back is rubbed vigorously to excite this type of energy, and increase performance in terms of mental awareness and speed of movement.

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Immunity Driver

The idea of an immunity Driver comes from the knowledge that the Spleen organ, although poor understood even today, is part of a system that drives the creation of cell for the immune system originating in the bone marrows all around the axial skeleton.

This field produced by the marrows is one of the basic energies of the body as identified by Traditional Chinese Medicine, and is created by the interaction of several organs, with the bone marrows being the most important. The Immunity Driver assists with the stimulation of blastic cells and also with the maturation of reticulocytes.

The system begins with mast cells, which are the precursors in the development of many other types of cell. The cells for this part of the immune system are created by blast cells, and this energy field driver is able to communicate with macrophages, which ingest foreign particles, lymph cells of which there are many types, red blood cells, as well as the many types of white blood cells.

Use of the Energy Driver will not instantly cause the immune system into action, since it is meant to stimulate the production of cells for the immune system which go into the blood after achieving maturity, a process that takes varying periods of time – from two or three days to one or more months.

This Driver then is a slow worker and should be taken constantly for at least one month in low doses, such as 6 drops a day.

It affects the viral immunity, and can be used for those with HTLV infection and its side effects, MS, as well as Chronic Fatigue. It is also useful for those with Pleomorphic organisms, because of its effect on the macrophages in the blood.

Its best partner is the Lung Driver, particularly for those with chronic respiratory infection, and there is a fall back position for those who do not find that this

combination has a clear effect. The Environmental Detoxification remedy can be taken with the Immunity Driver or even before the Immunity Driver is taken, since it is well known that many environmental toxins are able to delay maturity of the cells in the blood which form part of the immune system.

Although The Immunity Driver only causes the body-field to go back to its natural states, NES recommends on the side of caution and when there are diseases of the immune system like certain types of leukemia and/or too many red blood cells we recommend that The Immunity Driver should not be taken. However the remedy is ideally suited to cases where the blood count for red and white blood cells is below normal.

In emergency situations such as acute infections which do not respond to other treatments, then a dosage of 28 drops a day may be needed for short periods, of less than a week.

Dosage; 6 to 28 drops per day for at least one month.

Liver Driver

The Liver Driver is built around the actual function of the liver cells, the only organ in humans that regenerates itself every six months with new cells.

It is not recommended that the Liver driver is used on a client's first visit, treat with other drivers first. The Liver Driver assists with the maturation process of prothrombin.

The Liver Driver affects the Liver cells, their functions which are many and include the regulation of the blood clotting mechanisms – a long and complex sequence of chemical interactions – regulation of the lymphatic system, communication with certain cells in the Pancreas, and of course the duty of creating enzymes to detoxify the body, and the regulation of body pH. This Driver is not to be used by those with poorly regulated blood sugar levels without professional assistance but it may be used for hangovers!

It is not suggested that this Driver be used for the treatment or regulation of Diabetes Melitis.

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers, however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9

drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Pancreas Driver

The Pancreas is an organ very sensitive to environmental degradation, and therefore works well with the Environmental Detox remedy.

But as usual there is a catch. The body responds very badly to rapid changes in blood sugar levels, and so does your emotional state. It is not recommended that the Liver Driver and Pancreas Driver be used together and in non-recommended doses without monitoring blood sugar levels if higher doses are thought to be needed.

The Pancreas Driver assists with the maturation process of lymphocytes in the spleen.

But putting that single case aside, the Pancreas Driver is used for people with no appetite, poor digestion, headaches and pains in the pancreas. Those with hypoglycemia will often find that this shows positive on their test. It helps you to go longer without meals, without feeling queasy.

There are some interesting uses of the Pancreas Driver that would surprise some, since in research it shows positive for not only congestive headaches related to poor blood sugar regulation, but also for blackouts. It also shows a link with Glaucoma as well as Dysphonia. The link with the head can be explained using the bioenergetic theory of the energy pathways on the surface of the body put forward by the Traditional Chinese Medical doctors.

Caution in dosage is advised when using Liver Driver together with Pancreas Driver, where doses should not exceed the normal 6 drops per day.

As a normal procedure it should be remembered that, if Liver and Pancreas Driver are found together in the test, the Environmental Detox Remedy should be used for ten days before treating the Liver and Pancreas using the Drivers.

Dosage:

First session:

6 to 9 drops every third day

Upon sensitivity testing/main detoxification having occurred - 9 to 28 drops per day

The more symptoms that you have initially, the lower the dosage of the Drivers should be. There have been no adverse side effects reported after high doses of the Drivers,

however extreme detoxification is draining on the body and unnecessary. Healthy people can start on 15 drops every third day. However, less healthy people should start on 6 to 9 drops every third day. The same dosages apply for any combinations of the Drivers. However, if taking a number of the Drivers, a regime can be constructed in which different Drivers are taken on different days, with a period of three days between repeat doses of a single Driver taken in the order mentioned above. However once you decide to tackle the environmental screen (on session 3 or 4), then high doses of the Drivers can be taken to help provide enough energy to excrete toxins and viral particles (28 drops).

Thymus Driver

Thymus gland is associated with creating long term immunity patterns in children and teenagers. However, its function goes on later in life and is needed when the viral immunity is failing. New cells are made in the bone marrow and this relates to the function of Immune Driver. Thymus Driver however is related to long term antibody formation which will last for life. When there is a failure of antibody formation, this Driver is needed. Used on its own it will affect this process. However a special function against Energetic terrains is stimulated when Thymus Driver is combined with Energetic Integrator 6. All 13 Energetic Terrains are affected then. It is suggested that this approach is useful when there are many Energetic Terrains at once. The practitioner should look at the test and see if both Thymus Driver and Energetic Integrator 6 occur together. If so, they can be used together as an effective treatment.

The Thymus Driver assists with the maturation of myelocytes

Bone Driver

This is a combination of three other Drivers, for Liver, Kidney and Pancreas. Together they form a new energetic unit, called Bone Driver. It affects calcium metabolism in muscles as well as bones. It can be used with Energetic Integrator 3, for osteo - arthritis.

Its most important use however is in detoxification regimes when there are heavy metals as well as Aluminum residues in the bones and muscles. Many metallic toxins in the body bond with calcium. For this reason it will be found that Field Stabilizer can extend the activity of Bone Driver to get rid of unwanted metals from the bones. If you are targeting metals in the bones, you must use Bone Driver together with Field Stabilizer.

Clinical trials have shown that the appetite for food is returned to normal ranges when this Driver is used regularly.

It is used as well in Circulatory disease when plaque residues have to be excreted – and in this case it is used with Energetic Integrator 10.

There is also an effect on the heart muscle and can be used for swelling of the heart when there is clearly a toxic situation in body tissues.

When there is dumping of residues from the body in the hands and feet, Bone Driver is indicated.

The Bone Driver assists with the maturation of erythrocytes.

Environmental

The Environmental screens have two purposes:

- i) To help you to identify the sources of pollution that is affecting your client's body-field so that they can avoid them.
- ii) To help you to decide on the appropriate remedies to help detoxify your client in order that the body-field is able to go back towards being normal.

The screens are divided into two different views:

- i) Client View
- ii) Professional View

The Client view has been designed to make it easier for both you and your client to identify the broad categories of pollution.

The Professional view has been designed to provide more specific treatment information.

Although it is worth looking at this screen for client interest reasons on visit one (especially to help avoidance of pollutants), we recommend waiting until visit 3 before attempting to change the energetic terrain recommended on these screens.

Client view is divided into the following broad categories:

- Agriculture
- Water
- Heavy Metals
- Air Pollution
- Household
- Organisms
- EMF
- Overall Pollution
- Field Stabilizer

All of these can be treated generally with the Environmental Detoxifier, however for more specific action detoxing specific toxins, more specific remedies can be used which can be found by clicking on Professional view.

The Environmental Shock remedies are able to correct for the geno-toxicity of alien chemicals that enter the body and their ability to distort the DNA morphogenetic field.

These remedies cause strong detoxification reactions therefore make sure your clients take these slowly and build up to them (start on 6 drops every 2 days moving towards 9 drops every day) It is possible to mix all of the detoxification remedies in a glass of water especially in the case of taking other remedies.

For those that are full of environmental toxins we recommend high doses of anti-oxidants and the big field aligner to be taken alongside the Environmental toxin remedies. If detoxification becomes too unpleasant it can be balanced by stopping those remedies and taking the Emotional Stress Release Remedy.

The **Overall Pollution** bar is an indicator of the client's need for the Environmental Detoxifier which has been made from a combination of Energetic Integrators.

Organisms gives an indication of the amount of pleo-morphic organisms and viral particles in a particular client.

In particular **Pleo Group A and B** look at the energetic terrain which increases the likelihood of these odd shaped organisms. The remedies help the body's immune system get rid of them over a 5 to 6 week period. The Immunity Driver can also be used instead of Group A and B.

The **Viral particles** indicator is a test for the remedy Broad Spectrum Viral which can be looked up in the book or help files.

EMF – Electro Magnetic Pollution coming from gravity, magnetism, microwave oven radiation, airline travel, far infra-red, computers, cell phones, radio's, TV screens and radioactive isotopes.

6 drops a day of the EMF remedy for a 10 day period.

The Field Stabilizer

This is a test of instability of the Body Field which is induced by toxic residues particularly from metals of all types. Testing indicates that a huge number of elements actually affect the working of the cell

Mitochondrion – and hence is a cause of tiredness.

Sometimes a client can be tested many times, and each NESPro test is markedly different even though it is expected that different tests will vary to some extent. This is because the Compartments are being breached in various places causing chaos in the test readings. This is a sure sign that metal toxins are upsetting the field and that severe fatigue has set in. In this case it is a good approach if you use Bone

Driver together with Field Stabilizer. Of course environmental Detox Remedy is another option open to you.

Toxic elements and related compounds referred to here are:

Aluminum

Silicon

Barium

Tin

Phosphorus

Rhenium

Lead

Gold

Actinium.

The Field Stabilizer bar graph gives an indication of the client's need for detoxification of the above elements and their compounds.

If this comes up regularly then there is a case for continuous treatment Using Field Stabilizer, Bone Driver and Cell Driver. A sign that the field is stable once more is that the Nespro test is more Stable, indicating that the breaches in the entrances and exits to the 12 Compartments are being closed, and that the cell is working normally again. Most chronic diseases are associated with tiredness, but this one is a special case and should be used when the client shows a hypersensitive reaction to the environment generally, including city air pollution, cigarette smoke, non- organic food and alcoholic drinks with many additives such as beer.

For this reason alone this set of remedies are suggested for Chronic Fatigue, but will not on their own act as a cure, since the Environmental Terrain itself must be treated. It will be found that the metals in the bones leach out slowly and that the Field Stabilizer will show up and then disappear again over a matter of months. This is what is expected, since the toxins do not all exit the body in one go. Apart from CFS, it will be found that metals are a problem when there are breast growths, and in diseases affecting the bone marrows. Chaos in the Body Field is a feature of all serious diseases.

Dosage;

Bone Driver – 15 drops every 3 days

Field Stabilizer -6 drops every three days

Environmental Detox – 9 drops every three days.

Clients should be encouraged to drink plenty of water, take exercise and less food during the detox period.

Agricultural

This test gives an overall indication of your the damage done to your body-field through Agricultural and Food based toxins.

6 drops every 3 days of Environmental Detoxifier

Antibiotics

Some heavy-duty antibiotics may cause genetic damage to certain cells in the body, e.g. pituitary, colon, gall bladder and small intestine cells. Whilst most antibiotics are safe, some are not energetically clean. There are many antibiotics residues in agricultural products that can easily get into the human food chain.

6 drops every 3 days of Environmental Detoxifier and/or Energetic Integrator ?

Fungicides

Fungicides generally; distort Energetic Integrator 12, as well as energy fields for Lungs, Liver, Colon lining and Stomach lining. These can be inhaled when used in agriculture or ingested with residues in certain foods where withholding periods have not been observed before harvesting.

6 drops every 3 days of Environmental Detoxifier and/or Energetic Integrator 12

Insecticides

Insecticides are used mainly in agriculture and termite control and may cause severe damage to the Energetic Integrator 3 and 10 region of the Body Field. They may also cause damage to the energy fields of the lung, small intestine, mucous membranes, the heart, kidney, mucous membranes, circulation and liver. They can be absorbed via the lungs, skin and stomach. Damage to the small intestine energy field, together with its membranes, may result in severe food intolerances.

6 drops every 3 days of Environmental Detoxifier

Fat-based

Acrylamide can occur when certain fats are overheated (mostly found in fried foods). This may in turn cause damage to Integrator 4 and the fields of the Central Nervous System, the Lungs, Heart, Stomach lining and Large Bowel lining. If this shows up we recommend taking a look at your diet, reducing the amount of heated fatty foods and taking Energetic Integrator 4.

6 drops every 3 days of Environmental Detoxifier and/or EI 4

Water based

This is a combined test for arsenic, antimony and chlorine compounds. Arsenic and antimony occur naturally in the soil and can leach out slowly into reservoirs where the soil has been disturbed. Chlorine is added to water supplies in some countries and can be a great problem when there are opportunities for it to combine with organic pollutants.

6 drops every 3 days of Environmental Detoxifier

Heavy Metals

Heavy metals form organic compounds rapidly inside the body and are difficult to remove from the body for this reason. The organic compounds are found in muscle tissues, blood, neural fats and bone. The heavy metals get into the environment via a number of routes. For example, cadmium comes from jet fuel residues, some super phosphate fertilizers contain heavy metals, lead comes from car fuels and old paint, and mercury is used by dentists and can be found in some fish.

6 drops every 3 days of the Heavy Metal detoxifier and/or Environmental Detoxifier

Airborne

This test gives a summary of the effect that airborne pollution is having on your body-field.

6 drops every 3 days of Environmental Detoxifier

Petrochemicals

There are many types of petrochemicals, which cause damage to the body-field, this test looks at hydrocarbon solvents found in car fuels and synthetic rubber. It also tests for airborne pollutants produced from shale's oil, refineries and food via plastic containers that have been used in Microwaves. They cause a major distortion to the fields of Compartment 1, 10, heart, lung, bowel, stomach, liver and circulation.

6 drops every 3 days of Environmental Detoxifier

Industrial

There are many types of industrial chemicals that cause damage to the body-field. This overall test looks at some of the most common solvents found in industry, rather than the more common ones found in the household in the box to the right. They can damage the fields of the brain, ear, nose, throat, lungs, kidneys, circulation, bowel and stomach lining. They mostly affect Energetic Integrator 12 but also Energetic Integrator 10.

6 drops every 3 days of Environmental Detoxifier

Tobacco Smoke

This test indicates that Tobacco smoke has damaged your body-field and is particularly damaging to the Lung Driver.

Remedies for correcting severe sensitivity to tobacco smoke are;

6 drops a day of Skin Driver – acts as a general remedy for Tobacco smoke.

6 drops a day of Lung Driver, Energetic Integrators 2,4 and 12 may help to correct the fields of the lungs for the toxins taken in.

The Allergy medicine can also be taken upon allergic reactions to tobacco smoke (6 drops on reaction).

Household

This gives a summary of the damage done to the body-field by Household pollutants.

6 drops ever 3 days of the Environmental Detoxifier

Dyes

This tests for the damage done by the more damaging solvents used in the manufacture of Dyes rather than the dye itself. They affect the energy fields of Energetic Integrator 12, the heart, circulation, bowel lining and stomach lining.

6 drops every 3 days of Environmental Detoxifier and/or EI 12

Furnishings

This tests for damage done to the body-field by chemicals found in new furniture and carpets. They often react with ozone in the home to make aldehydes and scientific research has proven that it has neurotoxic and geno toxic effects. They affect the Energetic Integrator 4 region linking to the heart energy field, mid brain, pericardium circulation and the linings of the colon and stomach.

6 drops a 3 days of Environmental Detoxifier and/or EI 4

Solvents

This tests for damage done to the body-field by solvents more commonly found in the household rather than in industry. In particular it looks at solvents found in paints, dyes, gums, printing, petrol and varnishes. They affect the energy fields of the heart, circulation, bowel lining, brain and stomach lining.

6 drops every 3 days of Environmental Detoxifier and/or EI 12

Electromagnetic Pollution

All radiation is bad for the human body-field to varying degrees, and prolonged exposure to any type may lead to severe distortion of the Energetic Integrator 12.

"Ionising radiation, even at extremely low dose rates, breaks human chromosomes and inflicts enduring chromosomal injuries", said Goffman and O'Connor in 1985 (Health Effects of Common Examinations). Our research agrees with these findings and this test shows the effect on your body-field from electromagnetic pollution from gravity, magnetism, microwave oven radiation, airline travel, far infra-red radiation, computers, cell phones, radio's, TV screens and radioactive isotopes.

The EMF remedy has been made partly from using two of the extra eight meridians of Chinese Acupuncture. Our research has shown that these help the body to absorb

and mend damage inflicted by radiation. After the Hiroshima disaster, many people were treated with Moxibustion on their spleen acupuncture points with positive results.

6 drops a day of EMF remedy or EI 12

Herbal Kelp is also helpful.

Overall Pollution

This test gives an indication of the Overall Pollution levels affected the body-field and indicates how much you need of the Environmental Detoxifier remedy Field.

The Environmental Detoxifier has been made from a combination of the Energetic Integrators and can be used as a general detoxifier for all environmental toxins. Detoxification can be smoothed by taking the Big Field aligner and using copious amounts of anti-oxidants (e.g. Vitamins A, C and E).

3 – 9 drops every 3 days

Viral Particles

This gives an indication of the energetic terrain that leads to viral particles affecting your body-field. If this test comes up we recommend taking a look at the Professional view and clicking on the Organism's button, which will further categorize which types of viral particles may be affecting the client. For overall assistance against the energetic terrain that where viral particles proliferate use the Immunity Driver, Field Stabilizer and the relevant viral group remedy found under the Organism's button.

Advanced Protocols

The Advanced Protocols is a summary of the Field Stabilizer, Zero Tolerance items, and all the Energetic Terrains. The Advanced Protocols should be use with the Environmental Advanced Protocols screens for Practitioners with strong experience with the NES and the relevant qualifications.

Emotional

Nutri-Energetics Systems has extensively tested Dr. Hamer's theory that the medulla, a structure contained in the brain that is linked to the organs, can be imprinted by shocks. Our research shows that there is a field link between the medulla, the old brain, the pyramidal fibers, the spine, the organs and the skin. This indicates that disease is dynamic, i.e. it moves from one part of the body to another. Additionally, the twelve compartments of the Body Field can be connected with different parts of the medulla. Showing that if a shock is localized it will have a specific, rather than a general effect.

The medulla has all 12 of the main meridians passing through it and different parts of the medulla fit into each of our 12 compartments (or Energetic Integrators). The medulla, therefore, can be thought of as being responsible for controlling your

emotional states. The medulla, and hence your dominant emotional state, can be effected by all types of shocks (not only emotional) which can cause emotional tape loops to start playing.

An emotional tape loop is similar to a program in your head that continually governs your behavior. These tape loops are often re-triggered when under stress or tired, and they can be repeated day in, day out, with little conscious thought that these emotional patterns maybe damaging to yourself. Often there maybe no rational past experience that you can think of that causes their behavior. Rather we believe being caused by a fault in the medulla, which can have a variety of causes, such as faults in one of the 12 Energetic Integrators, an emotional shock, genetic and/or environmental influences.

Emotional tape loops can be linked very strongly to long-term errors in the Body Field and lead to an information-blocking network of fields. The relevant energetic integrator should help to correct the relevant section of the medulla and provide the correct information for a balanced emotional state. They may also help to bring the tape loops to the conscious mind.

Taking them can release years of pent up emotions. Clients have reported vivid dreams reliving childhood, or later experiences, as these emotional blocks are brought to the conscious mind for proper processing. Others have experienced anger for a few days, as their mind processes past mistakes and gain great realizations for appropriate future action.

The top 3 emotional states are depicted in the pictures on the right hand side, along with the color of your current emotional aura.

The various emotional states that are displayed on this screen should be interpreted as that emotional issue playing a large part in their life rather than as a lack of or excess of an emotion. Also we have simplified the emotional states of each part of the medulla to a particular word, which is an oversimplification to get the fuller meaning click on the bar graph and it will display the full explanation in the Help file. For instance when Honesty comes up, it does not mean that someone is necessarily dishonest, it means that honesty, loyalty and will power is presently a large issue in their life. For example it could be that they are having to sue someone because of being ripped off or that they are presently drained and have no will power or that they are excessively honest.

It is highly likely that most people who are displaying symptoms of various diseases will be in a fragile emotional state and the process of correcting the various layers of the body-field will cause emotional flare-ups. The use of the **Emotional Stress Release** remedy has been designed to be used when it all becomes too much and helps all parts of the Medulla to resolve issues much faster. This is one of the main reasons for looking at this screen so that you can monitor how emotionally fragile your client is and if so make sure they have a bottle of the **Emotional Stress Release** remedy on hand even if it does not come up in it's test as it may be hidden at that point.

The **Emotional Stress Release** remedy is a combination of Energetic 1, 7 and 12 and is able to help correct all of these different types of emotional state. It is extremely helpful in releasing day to day stress. However for more specific action

use the Energetic Integrator that goes through that part of the Medulla which can be found in the Help files (i.e. For Honesty it is EI 11)

Lack of Emotions is a test for the CNS/Restore remedy and is extremely helpful for Depression.

Female Cycles is a remedy used to help regulate female cycles

Organization

This field generates organization, hopefulness, and consideration. If the field is not correct there is excessive organization, and lack of consideration. It is part of the field of the large bowel and when errors occur the conflict concerns fears as opposed to hopefulness.

EI 1, 6 drops a day

And/or Emotional Stress Release 6 drops up to 6 times a day

Enthusiasm

This field is linked to mind states such as enthusiasm, love and wonderment. These together produce a feeling of self-identity. If there is a field error, this will be difficult to perceive.

EI 2, 6 drops a day

And/or Emotional Stress Release 6 drops up to 6 times a day

Concentration

This field is related to emotional states such as concentration, forcefulness and industriousness. To concentrate and do work, mental power is needed.

EI 3, 6 drops a day

And/or Emotional Stress Release 6 drops up to 6 times a day

Industriousness

This field generates forbearance, industriousness and punctuality. The field is generally described as the ability to maintain steadiness and is related to the Liver Field. When this field fails there is anger and lack of coherence.

EI 4, 6 drops a day

And/or Emotional Stress Release 6 drops up to 6 times a day

Cheerfulness

This field generates cheerfulness, concentration, ability to focus and trustfulness. This field is related to home, relationships and the breaking of family ties, and is correct when the Lung energy field is correct. It can be improved by Yoga asanas.

EI 5, 6 drops a day
And/or Emotional Stress Release 6 drops up to 6 times a day

Sympathy

This field generates sex appeal, sentimentality and sympathy. If this field is not correct then feelings of sympathy are replaced by animosity and rejection.

EI 6, 6 drops a day
And/or Emotional Stress Release 6 drops up to 6 times a day

Communication

This field generates honesty, loyalty and will power. If this field is not able to transfer information you may become listless and easily influenced.

EI 7, 6 drops a day
And/or Emotional Stress Release 6 drops up to 6 times a day

Tolerance

This field generates calmness, elation and tolerance. If this field is not able to transfer information you may become jittery and intolerant of noise.

EI 8, 6 drops a day
And/or Emotional Stress Release 6 drops up to 6 times a day

Courage

This field generates confidence, courage and the ability to articulate. If this field is not able to transfer information you may become quiet, afraid and silent.

EI 9, 6 drops a day
And/or Emotional Stress Release 6 drops up to 6 times a day

Thoughtfulness

This field produces emotions and mind states linked with calmness, meditation and thoughtfulness. This field produces the correct amount of thought - but excessive thought, or none at all are regarded as abnormal field states, related to the function of stomach field.

EI 10, 6 drops a day
And/or Emotional Stress Release 6 drops up to 6 times a day

Memory

This remedy helps to generate memory, spatial awareness, benevolence and confidence. Suitable for those suffering from both memory and decision making problems.

6 drops per day of the Memory remedy and/or EI 11

Contentment

This field produces emotions and mind states involved with contentment, ecstasy and generosity. These all produce feelings of pleasure, and if you cannot experience pleasure there is a field blockage.

EI 12, 6 drops a day

And/or Emotional Stress Release 6 drops up to 6 times a day

Forgiveness

This field generates cheerfulness, forgiveness and wonderment. If this field is damaged, as it may be in accidents involving the spine, then you cannot experience many positive emotions.

EI 12 and EI 1 together, 6 drops a day

And/or Emotional Stress Release 6 drops up to 6 times a day

Lack of emotions/ Depression

There is no disease so misunderstood as depression, and its causes and mechanisms. So naturally the treatments for it reflect this state of affairs.

There are energetic pictures that are present in people who have chronic depression, and these can be corrected without side effects and drug taking. This of course only refers to those who do not have physical damage to the central nervous system.

For Lack of Emotions take 6 drops a day together of the Neuron Pain, Nerve Detox and Nerve Function remedy

The Trauma remedy will help you cope as will the Emotional Stress Release. Take as many times per day as needed.

Stress Release

This tests for your potential need for the emotional stress release remedy. This is a combination of three of the Energetic Integrators. The first integrator in this combination is for the central nervous system generally, including the eyes and ears. The second is for the cortex or the outer part of the brain, where the processing of data takes place. The third influences the field created by the bridge between the left and right brain, so that one part of the brain knows what the other is doing. Stress results from incoming data not being correctly processed into patterns. Therefore, the Stress remedy is designed to allow the brain to continue to process data, so avoiding stress, by restoring normal links within the brain, especially to the medulla

oblongata. The Stress remedy also has a body-field balancing effect and can be used if wanting to slow down the effects of other remedies if you've been trying to push a little too fast.

Emotion 1: Co - Letting Go
Emotion 7: Ki - Mental Power
Emotion 12: Pleasure- Spleen

For sleep; reduction of hysteria; hypersensitivity. For psychic states requiring letting go- experiencing pleasure, mental concentration. Can also be used for sexual frigidity.

Dose: 15 Drops at night repeat in 4 hours if required.

Female Cycles

This test indicates how much emotional distress is due to a failure in the proper regulation of the fields of the female cycle. Our research has shown that rather than tampering with the very complex hormonal system, effective results can occur from improving the compartments of energy (or information) that control the hormonal system, enabling it to be better regulated. This test is not for period pain, but if they accompany irregularities in the female cycle Energetic Integrator 10 may be used with the remedy for Female Cycles.

Although these remedies are entirely based on returning a client's hormonal state to one that would occur in nature, NES are on the side of caution and don't recommend any stimulation of hormonal activity if a client has any breast cell abnormality's.

Use 6 drops of Female Cycles until regular (more specific treatment)
or 6 drops of EI 4 and 6 drops of EI 10 daily.

Aura

The color of the aura is related to the most significant emotional state that comes up on this screen.

All the following prevailing mind sets and emotional states are linked very strongly to long term errors in the body field and can be part of an information blocking network of fields.

Geranium

Concentration

This field produces emotions and mind states described as concentration, forcefulness, industriousness. To concentrate and do work mental power is needed.

Cardinal red

Enthusiasm

This field produces emotions and mind states described as enthusiasm, love, wonderment. These all together produce a feeling of self-identity. If there is a field error, this will be difficult to perceive.

Chestnut

Contentment

This field produces emotions and mind states described as contentment, ecstasy, generosity. These all produce feelings of pleasure and if you can't experience pleasure there is a field blockage.

Nasturtium (Orangey)

Thoughtfulness

This field produces emotions and mind states described as calmness, meditation, thoughtfulness. This field produces thought in the right amount - but excessive thought, or none at all are regarded as abnormal field states, related to function of stomach field.

Violet

Cheerfulness

This field generates cheerfulness, concentration, ability to focus, trustfulness. This field is related to home, relationships and the breaking of family ties, and is correct when the lung energy field is correct. It can be improved by Yoga.

Jade

Industriousness

This field generates forbearance, industriousness, punctuality. The field is generally described as the ability to maintain steadiness and is related to the Liver Field. When this field fails there is anger and lack of coherence.

Cream

Organization

This field generates organization, hopefulness, consideration. If the field is not correct there is excessive organization, and lack of consideration. It is part of the field of the large bowel and when errors occur the conflict is about fears as opposed to hopefulness.

Grass Green

Memory

This field generates memory, spatial awareness, benevolence, confidence. If this field is not correct there is poor spatial memory, lack of confidence and loss of memory due to the spatial distortion.

Cyclamen

Sympathy

This field generates sex appeal, sentimentality, sympathy. If this field is not correct then feelings of sympathy are replaced by animosity and rejection.

Cerise

Courage

This field generates confidence, courage, and ability to articulate. If this field is not able to transfer information you may become quiet, afraid and silent.

Navy blue

Honesty

This field generates honesty, loyalty, will power. If this field is not able to transfer information you may become listless and easily influenced.

Kingfisher Blue

Tolerance

This field generates calmness, elation and tolerance. If this field is not able to transfer information you may become jittery and intolerant of noise.

Kingfisher Blue

Forgiveness

This field generates cheerfulness, forgiveness, wonderment. If this field is damaged as it may be in accidents to the spines, then you cannot experience some positive emotions

Zero Tolerance

The body is very forgiving and will still function with many errors in its field.

Some things it will not forgive and so we have labeled certain field correctors as "in urgent need of attention". We are pointing out here that the body field information system cannot function without these items being corrected as an urgent priority. Particularly when there is active degenerative disease. The reason for this is that some field correctors are able to correct over the whole electro-magnetic spectrum of the electron's activity as well as that of the photon.

We suspect that the Zero Tolerance set of correctors may indeed be linked with the behavior of other important sub-atomic particles. The body field likes to be corrected sequentially, so it is important to review the Zero Tolerance correctors and give them one at a time in the sequence in which they appear on the NES test.

You will notice that they cover the big body field, several layers of immunity, the kidney, and the function and health of the nervous system. Once the function of one of the ZT correctors is corrected and no longer shows on the NES test., go on to the next one in sequence..

Polarity represents the beginning of healing, and Regeneration represents the end of healing. It is important to let the client know that it is necessary to keep going in order until Regeneration is reached.

Nerve Function

These drops are for restoration of normal nerve function which has been distorted by environmental factors which are too complex to be analyzed by their field effects.

They are also designed to restore the function of the glucose metabolism and calcium metabolism so far as they affect the nerve transmission function.

Testing by NES indicates use is restricted to spasms, twitches and chorea, such as found in Parkinson's Disease, but also in other conditions where there is excessive nervous system firing.

Testing indicates that this preparation is not useful for sleep disorders, pain of any kind, hypersensitivity or hysteria.

This preparation forms part of the Zero Tolerance group of preparations, and can be used where there is nervous exhaustion brought on by exposure to environmental toxins which are known to affect the function of the nervous system.

Dosage; 15 to 28 drops per day until the spasms of the nervous system cease.

Nerve Detox

This preparation has a very specific use, and that is for nerve synapses. It consists of number of Drivers related to nervous system functioning, as well as things for glucose metabolism , calcium metabolism, and stress.

It is used for nervous spasms, tiredness, listlessness and nervous exhaustion, as well as poor learning skills development in children. For Linguistic skill development in children, use with Heart Driver.

It has been called Nerve Detox because of its apparent effects on the following toxins that might affect the synaptic transfer;

Aluminum
Antimony
Arsenic

Lead
Mercury

This is a Zero Tolerance preparation, and this means that the body does not tolerate any error at all in synaptic errors, and that this treatment takes precedence. It is used for Collapse of the nervous system function and for subsequent Collapse of the body field.

Dosage; up to 28 drops a day can be given, but introduce this dose slowly, starting at 9 drops. Once no further changes are noticed in nervous system function, the client should be given Heavy Metal Detox treatment for a further month, since they are hard to remove.

Neuron Pain

This preparation is a combination of several Energetic Integrators, so that it communicates with the field for motor and sensory neurons.

This field is very sensitive to four classes of micro-organisms in the energetic field sense. These are fungi, protozoa, yeast and moulds.

The preparation can be used for diseases where neuron function is not normal, and this covers quite a large range of diseases – ascending paralysis, numbness and pain from Parkinson's Disease, and some types of ataxia. It is not used when there is paralysis in the late stages of the disease, since the ability of neurons to regenerate is limited.

It has been used for back pains following severe trauma. Severe pain appears to be affected in some cases, indicating an effect on the sensory neurons as well as motor.

Hysteria and depression sometimes relate to this preparation.

Naturally if the object is repair of the neurons and their ability to manufacture neurotransmitters, this preparation can be used alternatively with Regeneration. Bear in mind that nerve repair, if possible, is slow, and like all repairs is slower as age increases.

Effects on neuron damage affecting eyes and ears is possible. Naturally rapid results can occur if the neuron in question is able to be revived.

Dosage; for emergencies use 15 drops every few hours. For on-going treatment of chronics it should be used daily at 15 drops, alternating with Regeneration.

Trauma

For geopathic stress causing upset to bone marrows sexual or spinal trauma, resulting in reflex pains, mental shock causing hysteria, exposure to radio-activity.

Dosage: 15 Drops once a day in morning for preference

Regeneration

Creates a terrain in the body's genetic field for the re-growth of normal cells, so maybe be useful for some nerve degenerative diseases, like arthritis (not rheumatoid) or infectious and Parkinson's diseases.

Dose: 6 Drops every 3 days only

Environmental Professional view

This screen categories environmental pollutants that may have accumulated in your client's body by placing them in each Energetic Integrator that they effect most. However there may be more than 100,000 toxic chemicals present in our environment and as such we cannot include them all. The ones that we have included are what our research is currently telling us is inflicting the most damage on people's body-fields. As this information is updated, it will be included on latest versions available for download on www.nutrienergetics.com/updates.

The Environmental shocks are related to the Energetic Integrator remedies which may be used to help correct any damage done to the body-field by each pollutant. We have made both a general environmental detoxifier for use in most cases for use when great deals of different environmental pollutants are interfering with the body-field (most cases). However we can make specialized detoxification remedies for some of the most common and worst environmental toxins found in the practitioner software. These will have a much more specific effect at getting rid of just that toxin, but are more expensive due to having to make each one individually.

Please note that during interaction with NES, the raw chemical is not tested for, since it will have combined with the other chemicals in the body. NES tests for the damage caused to the body-field by the chemical after it has been absorbed into the body.

The Energetic Integrator readings are the same as on the main screen, and by clicking on them you can see which toxins (if any) are affecting them. If the Field Stabilizer indicator found on the Client view screen continues to come up after treatment with the Field Stabilizer and the Environmental Detoxification remedy, then it is worth looking at what toxins are affecting each compartment. Nutri Energetics Systems can make specific toxin detoxifiers on demand in rare cases (email office@nutrienergetics.com)

It is fairly important from visit three onwards (although it is perfectly acceptable to treat them earlier) to rid the body of Viral particles. These can be found by clicking on Organisms. What has to be remembered is that these are not tests for viruses (read paradigm section of this manual) rather are tests for the energetic terrain and as such bear no relation to conventional blood tests. In general if these come up we recommend taking 9 drops a day for a 14 day period. The client may experience temporary (2 to 3 days) flu type symptoms as these are resolved.

The other test to note under non-viral is CNS which stands for Central Nervous System Restore. This helps repair damage done by viral particles to the brain and nervous system and is particularly useful in all neurological conditions such as depression and schizophrenia etc. It was originally named the Happy Combo if that gives an indication as to it's effect. 9 drops every day

Pleo 1 – 12

Pleomorphism is a study independent of traditional microbiology and is based entirely on observations of unusual forms of microbial life in the blood, studied live by dark field microscopy, a technique developed as early as 1905. It has found supporters in Professor Enderlein of Germany and other microbiologists in France. Instead of studying the genetics of the microbes, observed when dead, this branch of study looks at the shapes of the organisms, and comes up with radically different interpretations concerning their place in disease processes.

Our research indicates that the cause of these odd shaped organisms is the distortion (caused mainly by environmental pollutants) of part of the 12 main energy compartments of the body-field. Through making a specific correction to this part of the energy compartment (a part of each Energetic Integrator), they may no longer be able to proliferate and maybe killed by the body's immune system. This may occur in 5 to 6 weeks after taking the appropriate correction remedy. The more specific Pleomorphic Remedies 1-12 are to be used after attempts have been made to better the general terrain with either ETCA, ETCB or both.

6 drops a day for 5 weeks

Energetic Terrains

Energetic Testing by various modern methods using a variety of commercial machines indicates that many microflora are present in foci in the body. But only rarely are these observations supported by positive medical testing results. It is clear that these "phantom" results are correct energetically and do represent a picture of an organism foreign to the body produced by damaged cell structures. Following Paston, who remarked that "the terrain is everything" these pictures have been called energetic terrains since they are placed where real infection can occur. They are precursors of disease as infection and appear to have infective qualities. They can slowly encroach upon new cells and tissues by infective activity. The terrains are manifestations of the morpho-genetic fields - those predicted by the biologist Rupert Sheldrake. They include fragments of infective viruses, misshapen organisms, mycoplasmas and all partial forms of viruses. 13 specific correctors have been supplied by NES to stop this type of chronic disease by correcting all function and genetic fields. Energetic Terrains represent a third type of energetic treatment, after Drivers, and Integrators. They are at the deepest level of disease.

Nucleic Acids and Energetic Terrains

Testing has been carried out to verify whether or not there is any evidence for the ET's being part of a morpho-genetic field. If they do, it is via a nucleic acid. All of the Energetic Terrains are able to communicate with nucleic acids according to the NES research, but not always correctly with DNA and RNA, and not always with the 12 amino acids needed by the body. Some of the ETs will communicate with the RNA and some with specific amino acids.

ET-1

This is a test for a particular Energetic Terrain that may cause viruses to proliferate. Viruses are strands – sometimes single sometimes double – of DNA or RNA. Around this is a coat which is often twenty sided called the capsid.

A key to the recognition of the virus by the immune cells is its coat type and characteristics.

ET-1 may be able to tag energetically types of viral fragments so that they may become recognizable to the bodies immune system.

Viral fragments are a little odd in that they are self-replicating, and behave as though they are alive, when in fact they are just bits of odd protein.

In addition to using the ET-4 remedy, the Cell Driver, Immunity Driver as well as Energetic Integrator 6 has to be carried out until this test no longer shows up, as a matter of priority in treatment. Why? It is believed they have a catastrophic effect on the body-field.

ET-1, 6 drops every 3 days

ET-2

This is a test for a particular Energetic Terrain that may cause viruses to proliferate. Viruses are strands – sometimes single sometimes double – of DNA or RNA. Around this is a coat which is often twenty sided called the capsid.

A key to the recognition of the virus by the immune cells is its coat type and characteristics.

ET-2 may be able to tag energetically types of viral fragments so that they may become recognizable to the body's immune system.

Viral fragments are a little odd in that they are self-replicating, and behave as though they are alive, when in fact they are just bits of odd protein.

In addition to using the ET-2 remedy, the Cell Driver, Immunity Driver as well as Energetic Integrator 6 has to be carried out until this test no longer shows up, as a matter of priority in treatment. Why? It is believed they have a catastrophic effect on the body-field.

ET-2, 6 drops every 3 days

ET-3

This is a test for a particular Energetic Terrain that may cause viruses to proliferate. Viruses are strands – sometimes single sometimes double – of DNA or RNA. Around this is a coat which is often twenty sided called the capsid.

A key to the recognition of the virus by the immune cells is its coat type and characteristics.

ET-3 may be able to tag energetically types of viral fragments so that they may become recognizable to the body's immune system.

Viral fragments are a little odd in that they are self-replicating, and behave as though they are alive, when in fact they are just bits of odd protein.

In addition to using the ET-6 remedy, the Cell Driver, Immunity Driver as well as Energetic Integrator 6 has to be carried out until this test no longer shows up, as a matter of priority in treatment. Why? It is believed they have a catastrophic effect on the body-field.

Indeed each chronic disease may have its own sets of rogue DNA, which Nutri-Energetics Systems are looking into.

ET-3 appears to affect cell growth patterns and may affect viral fragments from many viral families including the following:

Cyto megal Virus (CMV) - Herpe's family

Epstein-Barr Virus (EBV) - Herpe's family

Adeno virus (EDV)

This nucleic acid also appears to affect cell growth and auditory acuity.

ET-3, 6 drops every 3 days

ET-4

Energetic Terrain that may be related to BSE. BSE comes from contact with Beef and may be assisted with the following remedy:

ET-4 6 drops every 3 days

ET-5

Since 1945 there has been an explosion of viral infection in humans and one explanation seems to be the increased exposure to chemicals as well as increased opportunity for the viruses to travel due to the increase in tourism in that time.

But there are groups of viruses (Herpes, Papilloma, Wart Viruses and Bunya viruses) that infect the population now that defy efforts to get rid of them and human immunity appears to be weakening.

The ET-5 has been designed to correct the energetic terrain of the body-field to hinder these groups of viruses.

Viruses can be regarded as parasites that only come into the body when the body is ill, and testing so far has identified the major things that facilitate the presence of viruses in the body.

They are:

Vertical Axis error

Cell Driver error

Toxins from carpet backing, Dioxins, Radiation exposure, and the presence of some of the other pleomorphic organisms.

These viruses also form pleomorphic form, so that the body's anti viral immune system is not able to respond to them, since Pleomorphism means that there is a shift upwards in the carrier frequency of the information about the virus and hence the body can no longer react to them.

In order to change the terrain properly so that viruses may not take hold in such numbers, the patient needs to take the ET-2 remedy, Big Field Corrector and the Cell Driver. The Radiation remedy can also be added if needed.

Dosage is nine drops a day until the subsidence of any viral symptoms.

ET-6

This test represents the energetic terrain where a whole family of viruses may reside know to cause the common cold in humans. It is the same viral family that contains the rare but acute form of the cold called SARS, that appeared in China from animal hosts in 2003. It is not recommended that this test and treatment be used for this dangerous acute disease. The test is intended for use with mild forms of the common cold that change into pleomorphic forms over time. These are distorted versions of the virus that appear to remain in the body for long periods after the cold has in fact disappeared. It is thought that these contribute to the deterioration of the health of some, giving rise to diseases like asthma and catarrh. Homeopaths would call this pleomorphic form of the cold a miasma. On treatment, a cold-like episode may occur, lasting for about three days, followed by a general improvement in the state of the chest. It is distinguishable from the normal cold, which lasts for 10 to 14 days.

ET-6 Dosage 6 drops a day until improvement

ET-7

Many Chronic Fatigue patients suffer from a proliferation of Flavi viruses found in the outside part of the brain and are spread by arthropods (biting insects). The ET-7 remedy has been designed to correct the energetic terrain of the body-field to improve the response to the Flavi group of viruses.

Dosage is nine drops a day until the subsidence of any viral symptoms.

ET-8

This tests the energetic terrain of eight specially arranged genetic elements going together to represent a double or tandem virus, or viral particles arranged in a certain pattern. Our research indicates that there are two viruses linked together –

so doing to evade the immune systems of the body. Many years of research has gone into tracing this viral arrangement – and it has been found in 100% of the diagnosed Multiple Sclerosis cases tested in our laboratory (however this does not mean that this is a test for MS). If it is a virus it has not been identified or categorized according to family.

Preliminary research shows that this tandem viral pair, or collection of viral particles may represent the active factor of many neurological diseases with different clinical names. So far it has been linked with:

Parkinson's Disease
Schizophrenia, various types
Psychoneuroses
Depression and mania as well as
Multiple Sclerosis, various locations.

Technique of clinical application

Used on its own the ET-8 may act as a prompt to form antibodies, a process that may take some time. But when the body is not able to do this, other treatments are needed as well. Naturally, if the body had formed a resistance in the first place it would not have the disease. Hence the Immunity Driver is the main key to success.

The following remedies should be taken daily in this order, with the following dosages.

Stomach Driver 15 Drops
Pancreas Driver 15 Drops
Immunity Driver 28 Drops
ET-14 28 Drops
ET-8 25 Drops.

Patients may notice sneezing, headaches, flushes and mucous in the nasal cavity and chest while taking this regime.

Because irreversible damage to the coating of nerves and other brain structures may have taken place clinical results will be variable. Early treatment is likely to get better results

ET-9

This is energetic terrain test for the bacterium that is now known to be the cause of gastric reflux, acid stomach and ultimately stomach ulcers.

We recommend taking 28 drops of ET-8, it can be improved by using:

The Big Field Corrector

Stomach Driver

Energetic Integrator 7

Energetic Integrator 11

ET-10

This tests for the Energetic Terrain that may be related to Hepatitis A varieties affecting the liver function. All of them have a similar treatment, but there are some important differences.

If ET-10 comes up in testing use the following remedies to correct the field imbalances:

Big Field Corrector

Liver Driver

Immunity Driver

Integrator 8

ET-5 (may affect the Herpes Family)

Radiation

ET-11

This tests for the Energetic Terrain that may be related to Hepatitis B varieties affecting the liver function. All of them have a similar treatment, but there are some important differences.

If ET-11 comes up in testing use the following remedies to correct the field imbalances:

Big Field Aligner

Immune Driver

Pancreas Driver

Integrators 8 and 12

ET-12

This tests for the Energetic Terrain that may be related to Hepatitis C varieties affecting the liver function. All of them have a similar treatment, but there are some important differences.

If Hepatitis C (or Non A or Non B) comes up in testing use the following remedies to correct the field imbalances:

Big Field Corrector

Immune Driver

Liver Driver

Pancreas Driver

Dioxin (an immune suppressant)

Radiation (another immune suppressant)

ET-13

Favored places for fungi of various types to begin to cause troubles are

the blood

the large bowel

the chest cavity

the pancreas

bone tissue

Fungi can therefore play some role in many diseases, like asthma, bone growths, as well as irritable bowel syndrome.

There are three Energetic Integrators that have to be combined to get rid of fungi and these are

Integrator 2 for Lung

Integrator 6 for Kidney

Integrator 12 for Pancreas

When combined, these three make a field correction for the bones generally, and fungal diseases affecting them

When Integrator 2 and 12 are combined , these two make a correction for the breast and chest, and fungal disease.

When Integrator 2 and 6 are used together, these two make a correction for the blood, and fungal disease.

In the test, it should be noted that the Low Pleomorphic Organism test could also relate to Fungi.

Cell Driver is the one to use to assist in the eradication of fungi from anywhere in the body.

ET14

A treatment is provided for those whose disease falls outside the 13 recognized ET formulae - a general ET treatment. It should only be used as a supplementary treatment for complex ETs when they will not respond to treatment. General ET will stimulate the Thymus and eliminate actions of the kidney and bladder energetic systems. Chronic back and neck aches of muscular origin may responded well to GET. Extra fluids are recommended while taking 6 to 9 drops every third day.

Energetic Integrator 1.

Butanols; found in car fuels and is a hydrocarbon solvent, which may be found in synthetic rubber. Apart from major distortion of the Integrator, it also causes damage to the energy fields of the heart lung, bowel lining and stomach lining.

Energetic Integrator 2.

Dichlorvos; a commercially produced insecticide, of the organophosphate family, used in the treatment of termites. Causes distortion of Integrator 2. Causes damage to the energy fields of the Colon, Lung, Small Intestine and Stomach Lining. The dust from under houses can be inhaled, so exposing humans to the toxin.

Energetic Integrator 3.

Chlorpyrifos; a commercially produced organophosphate used as an insecticide in agriculture. Causes severe damage to the Integrator 3. Also causes damage to the energy fields of the Lung, Small Intestine, Mucous membranes generally and Liver. Is sprayed so can be absorbed via the lung and skin. Damage to the small intestine energy field, together with its Membranes, can result in severe food intolerances. There are many organo-phosphates that can cause this.

Energetic Integrator 4.

There are three tests in this section;

Acrylamide; can occur when certain fats are overheated. This in turn cause damage to Integrator 4. Acrylamide damage can cause central nervous system paralysis. Can occur as the result of cooking fats incorrectly. Our research shows that it occurs commonly as a cause of human body field error . In addition to the Integrator 4 , it affects the energy fields of the Lung, Heart, Stomach lining and Large Bowel lining.

4-Phenylcyclohexine; this chemical if found indoors on the backs of carpets - in the odor that comes from the latex lining. It reacts with ozone in the home to make aldehydes. It affects the Energetic Integrator for the heart energy field, particularly the part going to the mid brain. Scientists have agreed it has neurotoxic and genotoxic effects. In addition it affects the energy field of the Heart, Pericardium circulation, and lining of the Colon and Stomach.

Dioxane; an industrial solvent for cellulose. Known to cause depression when exposure occurs. In addition to its genotoxic effect on Integrator 4, it also affects the energy fields of the Ear Nose and Throat, Lungs, Kidney and Circulation.

Energetic Integrator 10 (Airborne Toxins)

Energetic Integrator 10 is particularly prone to being severely damaged by environmental toxins of the worst type. This Integrator is responsible for the production of many of the female cyclic hormones. Because of the number of chemicals that affect it, the testing has been divided into two sections.

The first section is for three airborne toxins.

Asbestos: used until very recently in brake shoes, and otherwise until recently as a building material and as protective clothing in industry. Fibers can be airborne, and they lodge in the lungs, where they are not broken down. Has an effect on Integrator 10. Affects the energy fields of the Lungs, Ear Nose and Throat, Circulation and Stomach lining. Although this is an almost inert chemical it causes severe irritation and changes to the body field structure.

Carbonyls: these are toxic gases like carbon tetrachloride, used as a solvent gas. It has a distorting effect on Integrator 10. It has very severe effects on the Integrator as well as on the energy fields of the Heart, Circulation, Bowel lining and Stomach lining.

Dioxins: airborne pollutants from shale oil and other petro-chemicals refinery sources. Food borne pollutants from heating food in plastic containers in microwave ovens. These chemicals distort the shape of Integrator 10. Extremely damaging and prevalent, and of many and various types, they damage the Liver function, Liver cells, Circulation and Stomach lining energy fields. Every effort must be made to correct for these as soon as possible after exposure.

Energetic Integrator 10. (General Group).

Pentachlorophenol (PCP): an insecticide, a very effective one, and is still used for termite control. Exposure will affect Energetic Integrator 10, as well as the energy fields for Heart, Kidney, Mucous membranes, and Circulation.

Tetrabutyl tin: organic tin compounds can affect those who swim near sewage outfalls. Organic tin is used as an antifouling paint, as catalysts, and as PVC stabilizers. PVC's are used in rubber substitutes, cable coverings, upholstery textiles, raincoats, shoes, and tubing. This group of chemicals have effects on estrogens and androgens. Energetic Integrator 10 is affected, as are the energy fields of Kidney, Circulation, Mucous membranes, and Stomach lining.

Energetic Integrator 11.

Cadmium: From jet fuel residues, batteries and cigarette smoke

Heavy metals form organic compounds rapidly inside the body and are difficult to remove from the body for this reason. The organic compounds are found in muscle tissues, blood, neural fats and bone. We have made a general heavy metal detoxifier, however we are also able to make specialized heavy metal detoxifiers which have a more targeted action against specific heavy metals on request.

Lead: From car fuels and old paint.

Heavy metals form organic compounds rapidly inside the body and are difficult to remove from the body for this reason. The organic compounds are found in muscle tissues, blood, neural fats and bone. We have made a general heavy metal detoxifier, however we are also able to make specialized heavy metal detoxifiers which have a more targeted action against specific heavy metals on request.

Mercury: From dentistry and some fish.

Heavy metals form organic compounds rapidly inside the body and are difficult to remove from the body for this reason. The organic compounds are found in muscle tissues, blood, neural fats and bone. We have made a general heavy metal detoxifier, however we are also able to make specialized heavy metal detoxifiers which have a more targeted action against specific heavy metals on request.

Energetic Integrator 12.

Energetic Integrator 12 is affected by many chemicals so this section is divided into testing groups for

- Group 1 Agricultural fungicides and pesticides
- Group 2 Solvents
- Group 3 Metals.
- Group 4. Electromagnetic radiation.

1. Agricultural fungicides and pesticides

Allethrins; insecticides made to mimic the naturally occurring insecticides like pyrethrin, cinerin, and jasmolin. They distort Energetic Integrator 12, and in addition distort energy fields for Lungs, Bladder, Mucous Membranes, and Stomach lining.

Fungicides generally; distort Energetic Integrator 12, as well as energy fields for Lungs, Liver, Colon lining and Stomach lining. These can be inhaled when used in agriculture or ingested with residues in certain foods where with-holding periods have not been observed before harvesting

Pentachloronitrobenzene; a fungicide used specifically to treat seeds before they are sown, and one used on the soil to destroy micro flora. Distorts Energetic Integrator 12, and upsets the fields for Heart, Lungs, Ear Nose and Throat, and Liver.

2. Solvents.

n-Heptane; used as a solvent and for testing engines knocks. Affects Energetic Integrator 12, as well as energy fields for Ear Nose and Throat, Lungs, Kidney, and Circulation.

Hydroxytoluene; a benzene attached to a carbon. A solvent used in paints, dyes and gums. It causes distortion of Energetic Integrator 12, as well as distortion to the fields of the Ear Nose and Throat, Kidney, Liver and Circulation.

Nitrotoluene; a solvent used in dye manufacture. It causes severe distortion of Integrator 12, as well as distortion to the fields of the Heart, Kidney, Mucous membranes, and Stomach lining.

Xylenes; a common group of chemicals used as a solvent in the printing, rubber and leather industries. It forms naturally during forest fires. It is found as a thinner for paint and varnishes. Small amounts are found in aviation fuel, and petroleum. It is known to affect the human brain, and growth and development at least in animals. It affects Integrator 12, as well as energy fields for Heart, Circulation, Stomach and Bowel lining.

3. Metals.

Nickel-Chromium-Beryllium alloy; known as agents for allergy, they also are suspected of deeper damage. Nickel-Chromium alloys can be used in dental work. Beryllium alloys can affect the energy centre of the cell, or Adenosine Triphosphate. The triple alloy affects Integrator 12, as well as the fields for Kidney, Liver, Mucous membranes and Stomach lining.

4. Electro-Magnetic Pollution.

All radiation is bad for the human body field, and all of its various types, including ionising radiation causes severe distortion of the body field Integrator 12. Herbal Kelp and homeopathic Graphite D30 appear to be of some use in minimising its effects. There is a general remedy for the alleviation of this type of pollution from this company. It should be taken together with the Integrator 12 remedy. You are advised to minimize your exposure.

Variations of Gravity and Magnetism; sometimes underground ore bodies, caves and water can affect the human body field. This is a general test for distortions caused by these variations.

Microwave oven radiation; represents a possible source of pollution in the realm of the effects on proteins exposed to the radiation.

Far Infrared radiation; has an effect of linking to the foci of disease centers in the body, and may not be useful to the body so far as the integrity of the field is concerned. Therapy using Far Infrared is not recommended.

High Speed Computer Main frame; a 2003 model computer. Radiation is at many levels, making a composite of many wavelengths.

Cell Phone GSM .9 GHz and GSM 1.8 G Hz; every cell phone has a different frequency and there will be wide variations between countries and systems. The test includes some British and Californian types.

Radio frequency, Computer and TV screen radiation, electro-smog, radioactive isotopes used in medicine, Barium, and X-ray exposure; these can all be tested together and will account for the greatest number of exposures in most people. No level of radiation is safe so far as the body field is concerned.

Musco-skeletal

Shocks can occur to the Body Field from purely physical things such as injuries. This may seem a very alien concept to most people, but shock has a memory that is recorded in your body and is often difficult to resolve. Ever wonder why your shoulder or knee can still hurt years later and never seems to properly heal? Your Body Field in this area has been distorted from its correct position and needs reminding how it should be.

Bodywork such as Shiatsu and Acupuncture often do not treat the direct area of pain, rather they treat related meridians that, more often than not, get rid of the pain. Why? They are helping to correct the Body Field that passes through the relevant tissue. As the correct messages for the Body Field are fed to the injured part of the body, the tissue begins to go back towards homeostasis and pain goes away. The pain is often only a manifestation of something wrong elsewhere.

Every part of your client's body is communicating with energetic information that can be related to a combination of the Energetic Integrators, and hence can be treated with a specific combination. Much like the acupuncturist will treat an acupuncture point in your hand to get rid of a headache, through the use of the Energetic Integrators you can give your client's Body Field the information it needs to get back towards its correct structure, in order so that the body may follow.

The screen on your left indicates where NES – Professional has found a physical shock to your client's body-field, the larger the shock the redder the circle. This most commonly corresponds to physical shocks and/or pain that you have had or are currently experiencing. To find out the best combination of Energetic Integrators that may remove the shock to your body-field, click on the circle and the combination will be displayed in the top left hand box.

Take 6-28 drops per day of each mixed in sequence in a glass of water until removal of shock.

The more physical an injury is (growths/broken bones/scarred tissue etc), the harder it is for the body to ignore the message of the incorrect physical structure that is currently in place. However, the Energetic Integrators will always be working to give your client's Body Field the correct structure and may work especially well on unexplained pain.

The Energetic Integrators also contain specific instructions for the correct mineral balance inside cells. Dr. Max Gerson, the inventor of the Gerson Cancer therapy, spent many years looking at the ratio of potassium to sodium in cells, in order that cell metabolism could work correctly. Our research has also found four other important ratios:

Calcium to Sodium – related to distortion of the cell
Calcium to Potassium – related to heavy metal retention
Calcium to Magnesium - related to muscle function and nerve function
Sodium to Potassium – related to all 12 forms of pleomorphic organism

Therefore, by using the Energetic Integrators in the following combinations for various physical shocks occurring around your body, you will also be giving your tissues the correct information that they require to correct the mineral balance in the

cell and hence reduce inflammation. These combinations work best of all when used in combination with the Big Field aligner and the Muscle Driver.

They can be used for all types of arthritis and may reduce inflammation around the joint, and may affect all types of tissue within the joint – nerves, bone, muscle, discs, tendons and the joint capsule itself. There may be a corresponding illness in the organ related to the Energetic Integrator, and this too may respond to the treatment.

Meta Tarsal Joints – Foot and sole of foot:

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 6 (Kidney)
Energetic Integrator 10 (Circulation)
Energetic Integrator 11 (Stomach)

Dosage: 6 – 28 drops

Sciatic Nerve Field Connections:

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 1 (Colon)
Energetic Integrator 4 (Heart)
Energetic Integrator 8 (Liver)

Dosage: 6 –28 drops

Temporo-Mandibular Joint (Jawbone):

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 8 (Liver)
Energetic Integrator 11 (Stomach)

Dosage: 6 – 28 drops

Thoracic Spine:

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 5 (Bladder)
Energetic Integrator 11 (Stomach)

Dosage: 6 – 28 drops

Occiput (neck & back of head):

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 1 (Colon)
Energetic Integrator 7 (Gall Bladder)

Dosage: 6 – 28 drops

Shoulder blade – Scapula:

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 3 (Small Intestine)
Energetic Integrator 4 (Heart)

Dosage: 6 – 28 drops

Shoulder joint (Gleno-humeral):

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 1 (Colon)
Energetic Integrator 10 (Circulation)

Dosage: 6 – 28 drops

Toe joints and Big Toe:

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 9 (Mucous Membranes)
Energetic Integrator 12 (Pancreas)

Dosage: 6 – 28 drops

Iterations: 28

Finger joints and thumb:

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 2 (Lungs)
Energetic Integrator 8 (Liver)
Energetic Integrator 11 (Stomach)

Dosage: 6 – 28 drops

Ileo-sacral joints and hip joints:

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 7 (Gall Bladder)
Energetic Integrator 12 (Pancreas)

Dosage: 6 – 28 drops

Sacral Area (lower tip of spine)

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 4 (Heart)
Energetic Integrator 5 (Bladder)

Dosage: 6 – 28 drops

Lumbar Spine. (lower back)

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water. It can also be used with the Occiput (neck & back of head) combination taken separately.

Remedies: Energetic Integrator 8 (Liver)
Energetic Integrator 12 (Pancreas)

Dosage: 6 – 28 drops

Ankle Joints

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 5 (Bladder)
Energetic Integrator 7 (Gall Bladder)

Dosage: 6 – 28 drops

Knee Joints:

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 5 (Bladder)
Energetic Integrator 6 (Kidney)
Energetic Integrator 12 (Pancreas)

Dosage: 6 – 28 drops

Wrist Joints

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies

Energetic Integrator 3 (Small Intestine)
Energetic Integrator 9 (Mucous Membranes)

Dosage: 6 – 28 drops

Elbow Joints

For best effect use The Big Field Aligner, Muscle Driver and the following combination of Energetic Integrators added in sequence to a glass of water.

Remedies: Energetic Integrator 1 (Colon)
Energetic Integrator 10 (Circulation)

Dosage: 6 – 28 drops

Nervous System Treatments

The nerve cell itself is energetically different in its various parts, there being major categories of energetic treatments for the tail of the cell, the axon, the nerve itself, the neuron, and the coating of the axon, which is different again. Lastly we have the "gaps" in the nervous system, the synapses, and all the electro-chemical activity associated with generating the field for the nerve axons to carry quantized information. Bear in mind that western academic medicine does not have treatments for nervous system diseases apart from chemical ones based on replication of neurotransmitters, of chemicals to inhibit their effects, like pain killers and anesthetics. We go a long way past this approach.

1. Motor and Sensory Neurons

Found in the cortex of the brain. Other types are found within the brain tissue.

Neuron Pain is the preparation for damage to nerve cells. The main application is numbness and tingling, but not where there is complete paralysis. It is not used most back pain, since Integrator 5 with Muscle Driver is used there.

Neuron Pain can be used with Trauma medicine where pain is caused by injury to the central nervous system. this includes Cerebro-Vascular Accidents. Naturally CVA is a

case where regeneration preparation is required. this is a picture of a stem cell, and if the cell is able to regenerate, this will assist energetically.

There are effects on the neurons related to the eyes and ears where these appear on the cortex. Neuron Pain preparation can be used with auditory acuity as well as visual acuity. These can be followed by Regeneration - a preparation that is always used in a last treatment sequence.

2. The Axon

Damage to the outer coating of the axon is included here, and we use Nerve Function preparation for all types of Multiple Sclerosis. It is also for spinal cord damage since it is tagged with Schwann Cells, cells that are wrapped around the outside of the axon. Nerve Function can be used with Trauma preparation. Regeneration can be used last. To affect the myelin sheath, do not use nerve function. you must use nerve detox for myelin sheath diseases. Regeneration does not work on myelin sheath.

3. The Synapse

Here we use Nerve Driver with Nerve Detox. There are synapses all over the body, and their malfunction is related to many very specific diseases. These are Myesthenia Gravis, extreme mental tiredness or neurasthenia, learning difficulties in children related to language development, and maths concepts development. Narcolepsy. These two preparations can be followed by Environmental Detox or Heavy Metals. Regeneration is not used.

4. Combinations

One excellent combination treatment can be used, consisting of Nerve Driver, Stomach Driver, Nerve Detox and Nerve Function, mixed together in one glass, and taken once every third day. This is for dementia, ageing and Alzheimer's disease, which can now occur even in young people. You may not cure it but you may slow its progress.

Nerve Function

These drops are for restoration of normal nerve function which has been distorted by environmental factors which are too complex to be analyzed by their field effects.

They are also designed to restore the function of the glucose metabolism and calcium metabolism so far as they affect the nerve transmission function.

Testing by NES indicates use is restricted to spasms, twitches and chorea, such as found in Parkinson's Disease, but also in other conditions where there is excessive nervous system firing.

Testing indicates that this preparation is not useful for sleep disorders, pain of any kind, hypersensitivity or hysteria.

This preparation forms part of the Zero Tolerance group of preparations, and can be used where there is nervous exhaustion brought on by exposure to environmental toxins which are known to affect the function of the nervous system.

Dosage; 15 to 28 drops per day until the spasms of the nervous system cease.

Nerve Detox

This preparation has a very specific use, and that is for nerve synapses. It consists of number of Drivers related to nervous system functioning, as well as things for glucose metabolism , calcium metabolism, and stress.

It is used for nervous spasms, tiredness, listlessness and nervous exhaustion, as well as poor learning skills development in children. For Linguistic skill development in children, use with Heart Driver.

It has been called Nerve Detox because of its apparent effects on the following toxins that might affect the synaptic transfer;

Aluminum
Antimony
Arsenic
Lead
Mercury

This is a Zero Tolerance preparation, and this means that the body does not tolerate any error at all in synaptic errors, and that this treatment takes precedence. It is used for Collapse of the nervous system function and for subsequent Collapse of the body field.

Dosage; up to 28 drops a day can be given, but introduce this dose slowly, starting at 9 drops. Once no further changes are noticed in nervous system function , the client should be given Heavy Metal Detox treatment for a further month, since they are hard to remove.

Neuron Pain

This preparation is a combination of several Energetic Integrators, so that it communicates with the field for motor and sensory neurons.

This field is very sensitive to four classes of micro-organisms in the energetic field sense. These are fungi, protozoa, yeast and moulds.

The preparation can be used for diseases where neuron function is not normal, and this covers quite a large range of diseases – ascending paralysis, numbness and pain from Parkinson's Disease, and some types of ataxia. It is not used when there is paralysis in the late stages of the disease, since the ability of neurons to regenerate is limited.

It has been used for back pains following severe trauma. Severe pain appears to be affected in some cases, indicating an effect on the sensory neurons as well as motor.

Hysteria and depression sometimes relate to this preparation.

Naturally if the object is repair of the neurons and their ability to manufacture neurotransmitters, this preparation can be used alternatively with Regeneration. Bear in mind that nerve repair, if possible, is slow, and like all repairs is slower as age increases.

Effects on neuron damage affecting eyes and ears is possible. Naturally rapid results can occur if the neuron in question is able to be revived.

Dosage; for emergencies use 15 drops every few hours. For on-going treatment of chronics it should be used daily at 15 drops, alternating with Regeneration.

Trauma

For geopathic stress causing upset to bone marrows sexual or spinal trauma, resulting in reflex pains, mental shock causing hysteria, exposure to radio-activity.

Dosage: 15 Drops once a day in morning for preference

Regeneration

Creates a terrain in the body's genetic field for the re-growth of normal cells, so maybe be useful for some nerve degenerative diseases, like arthritis (not rheumatoid) or infectious and Parkinson's diseases.

Dose: 6 Drops every 3 days only

Nutrition

Introduction

Correction of Nutritional Deficiencies via Nutri-energetics Remedies

Minerals

Anti-Oxidants

B Vitamins

Blood Oxygenation

Metabolism

Introduction

NES - Professional is able to interact with the Body Field to provide information about the body's state regarding nutritional levels. This is due to the fact that vitamins, minerals and other nutrients are required by the body to reach optimal health, and reductions in their levels will affect the performance of the different energy drivers and compartments of the Body Field. Although the Remedies are able to make corrections to the Body Field regardless of nutritional deficiencies, we advise that if the software repeatedly shows errors in the nutrition section, you should carefully examine client's diet, with the aim to increasing the amounts of vitamins, minerals and antioxidants that they consume. A rule of thumb is to decrease the amount of processed, high fat and high sugar foods that they eat, and increase their intake of fresh fruits, vegetables and whole grains.

With respect to the conventional, textbook view of nutrition, we view the causes of nutritional deficiencies and their subsequent actions on the body a little differently. In our opinion, nutritional deficiencies are a result of environmental toxins interfering with the Body Field and hence inhibiting the proper uptake and balance of nutrients within cells all over the body. Through the use of the Nutri-energetics remedies and correction of the Body Field, your client's body may begin to utilize the nutrients it gains from food in the proper way, correcting any nutritional deficiencies. It is a fact that there are less nutrients in agricultural soil in modern times, however in general (at least in the west) the human population now has access to the most varied diet in human history. Thanks to the supermarkets and fast, international transportation, we have ample access to nutritious foods from all over the world. Therefore rather than malnutrition, we consider environmental toxins to be the main cause of nutritional problems at least in the West.

It should be noted that whilst the software is able to detect nutritional deficiencies, we do not advise recommending individual dietary supplements to correct these errors, unless you are a qualified nutritionist. Different combinations of vitamins and minerals interact together in complex ways that can have all sorts of effects (e.g. excess use of Vitamin C inhibits copper absorption). Rather we recommend concentrating on helping malabsorption and the correction of the mineral balance in the cell.

Correction of Nutritional Deficiencies via Nutri-energetics Remedies

As mentioned above, environmental toxins and subsequent errors in the Body Field can cause many nutritional deficiencies. To return the Body Field to normal, there are four stages that need to be looked at:

1) The removal of environmental toxins from your body

All the Nutri-energetics remedies help remove toxins from your client's body, however the Stomach Driver has been specifically designed to remove toxins from the small and large intestine. For more specific environmental removal, please refer to the environmental screen.

2) Helping absorption

There are 3 remedies that are especially good at helping absorption. The first is the Stomach Driver. The second is Energetic Integrator 3, which has a boosting effect on absorption within the small intestine. Thirdly, the combination of Energetic Integrators 1, 7 and 12 (the emotional stress releaser) also helps with absorption. Therefore, a combination of these three remedies can be extremely effective at aiding absorption of nutrients in the body.

If your client's do take supplements, taking the emotional stress release at night followed by the supplements can increase absorption of these nutrients. This is because the body's absorption rate increases whilst asleep and not under stress.

3) The correction of nutrient levels in the cell.

All of the Energetic Integrators contain different information for correcting mineral uptake in the cells. Continuing on from the work of Dr. Max Gerson, who discovered the importance of correcting the Potassium/Sodium balance in the cell, we have since found further relationships between ill health and another 4 critical ratios. Through using the software and the Energetic Drivers and Integrators, corrections can be made to eradicate these errors.

Calcium to Sodium – related to distortion of the cell

Calcium to Potassium – related to heavy metal retention

Calcium to Magnesium - related to muscle function and nerve function

Sodium to Potassium – related to all 12 forms of pleomorphic organism

4) Consume greater amounts of healthier foods.

Avoid foods suspected of having a high environmental toxin load (as a rule of a thumb the more packaged/processed/additives a food contains, the more likely it will have a greater amount of environmental toxins in it). If they would like to take minerals to help replace any found to be lacking, we recommend taking colloidal minerals as these also raise the paramagnetic index of the Body Field, helps to increase the rate of information transfer and can speed recovery.

Minerals

Four percent of the human body is made up from minerals. These minerals are elements that can be found in the periodic table, and are used mainly in the regulation and balancing of the body chemistry. The other major uses of minerals are in the constitution of bone, which requires calcium, phosphorus and magnesium, and in the control of water, which involves sodium and potassium. These five minerals are known as macro-minerals as relatively large amounts are needed every day (300-3000 mg). The other elements are known as trace minerals, as only small amounts are required (30mg – 30 mcg). All minerals are important in our diets, no matter how much or how little is required per day. If the body does not receive the minerals that it needs, then serious effects can occur.

The software is able to detect deficient levels of a number of minerals in the body, the nature of which are described by clicking on the particular mineral.

There are 3 remedies that are especially good at helping mineral absorption. The first is the Stomach Driver. The second is Energetic Integrator 3, which has a boosting effect on absorption within the small intestine. Thirdly, the combination of Energetic Integrators 1, 7 and 12 (the emotional stress releaser) also helps with absorption. Therefore, a combination of these three remedies can be extremely effective at aiding absorption of nutrients in the body.

For general mineral deficiencies we recommend the Ionic Trace Minerals solution.

Colloidal minerals – as per instructions on the bottle

Chromium

Vital component, along with vitamin B3, glycine, glutamic acid and cystine, of a compound produced in the liver that helps transport glucose from the blood to cells.

Frequent sugar consumption or continued stress lead to reduced levels of chromium. Found in whole grains, pulses, nuts, seeds, mushrooms and asparagus.

Cobalt

Cobalt is an essential mineral, although the body only needs a small amount. Cobalt is stored in red blood cells with smaller amounts in the kidney, liver, pancreas and spleen. Research indicates that cobalt helps with the repair of the myelin sheath, increases the effectiveness of glucose transport from the blood into body cells, and increases the assimilation of iron and the building of red blood cells. Cobalt is an important agent of Vitamin B-12; as it increases the body's ability to absorb it. Cobalt stimulates many enzymes of the body and normalizes the performance of other body cells. Because of its low absorption rate and high excretion rate, cobalt toxicity is not common, but an excess can lead to enlargement of the thyroid gland.

Manganese

Involved in many enzyme systems in the body, the most critical of which acts as an antioxidant helping to disable free radicals. Diabetics frequently have low manganese levels, therefore it has been linked with blood sugar balance. It is also linked with the formation of cartilage and correct brain function. Hence signs of a deficiency can involve joint pain and mental illnesses. The best sources of manganese are found in whole grains, nuts, seeds, tea and tropical fruits.

Magnesium

Works alongside calcium to maintain muscle and nerve impulses and bone density. It is also essential for the functioning of many enzyme pathways, and is linked with protein synthesis and the production of some hormones. Deficiencies in magnesium have been strongly linked with cardiovascular disease and muscle spasms. There is strong evidence that some heart attacks may be caused by cramping in the arteries connected to the heart, rather than blockages. Magnesium is a vital component of chlorophyll and is present in all green leafy vegetables, nuts and seeds.

Sodium

There is roughly 92g of sodium in the body, which mainly comes from the salt (sodium chloride) in our diets. The majority of this sodium is present in the fluids surrounding cells, where it is involved in nerve transmission and in maintaining water concentration in blood and body fluids. Deficiencies are extremely rare, due to the high amounts of salt present in processed foods. In fact, excess sodium in the body can contribute to elevated blood pressure and fluid retention.

Zinc

This trace mineral plays a part in nearly every major disease, including diabetes and cancer. Its main role is concerned with the protection and repair of DNA, however, it is also required to make insulin, the antioxidant enzyme superoxide dismutase, and to boost the immune system. Deficiencies in zinc are extremely common and lead to symptoms that range from lack of appetite, poor growth and poor skin, to mental and emotional problems. Oysters are the highest dietary source of zinc, and it is found in higher levels in animals and fish than in plants.

Potassium

Works alongside sodium in controlling water balance and correct nerve and muscle impulses. However, less potassium is required in our diets, yet most people do still

not eat enough. Severe deficiencies can result in loss of appetite, vomiting and muscular weakness. Good sources of potassium are whole grains, fruit and vegetables.

Iron

This is a major component of hemoglobin, which is involved in the transport of oxygen and carbon dioxide in the blood stream. The most common route into the body is via red meat, but it is also found in non-haem forms (~40%) in non-meat food sources, however this is not absorbed as readily. Iron deficiency symptoms include pale skin, tiredness and nausea. At the other end of the scale, too much iron may increase the risk of cardiovascular disease.

Phosphorus

This is required for the formation and maintenance of bones and teeth. It is also used in energy production, to boost metabolism and to maintain the pH of the body. Dietary deficiencies are uncommon, due to its presence in most foods.

Copper

Only a small amount of copper is required in the body and it is used, amongst other things, in the formation of myelin sheaths around nerves. Excess copper in the body is a more frequent problem than too little, due to the fact that copper pipes contaminate most water supplies. High copper levels are associated with schizophrenia and cardiovascular disease.

Calcium

This is required in the formation of bone structure, especially at an early age when bones are growing, and in old age when the ability to absorb calcium decreases. It also promotes a healthy heart and nerves and aids in blood clotting. Most western diets are slightly calcium deficient. The symptoms of this include muscle cramps, joint pain, insomnia, tooth decay and high blood pressure. Severe deficiencies can lead to osteoporosis. Energetic Integrator 1 is critical for calcium absorption.

Molybdenum

This mineral is used in the strengthening of teeth, detoxification from free radicals, and ridding the body of waste products. The deficient signs are unknown, however high levels of molybdenum can lead to gout-like symptoms. The best sources of this mineral are tomatoes, lentils, beans, wheat germ, pork and lamb.

Selenium

Has antioxidant properties, helps the immune system, reduces inflammation and promotes a healthy heart. The symptoms of deficiency include cataracts, high blood pressure and signs of premature aging. Good dietary sources are tuna, oysters, mushrooms, herrings and liver

Antioxidants

Antioxidants are chemicals present in the body that are able to disable free radicals. Free radicals are produced in the body when oxygen becomes unstable and capable of oxidizing neighboring molecules, as occurs during normal biochemical reactions. Oxygen is our most important nutrient and is the basis of plant and animal life. However, oxygen is extremely reactive, and hence the production of free radicals often leads to cellular damage that can trigger inflammation, cancer and aging. Free radicals are produced in all burning processes, including the combustion of petrol,

frying food and smoking. Therefore, we are exposed to free radicals almost constantly.

The balance between exposure to free radicals and intake of antioxidants is a very important one. The amount of free radicals that you come into contact with will be affected by your lifestyle and living arrangements, which may be difficult to control. Therefore, it is most likely easier to push the balance in the correct direction by increasing the amount of antioxidants that you consume. The common sources of dietary antioxidants are as follows:

Vitamins A, C and E:

The main providers of antioxidants that are found in fruit and vegetables. Sweet potatoes, carrots, watercress, peas and broccoli are especially good sources.

CoQ10:

This is a semi-essential nutrient and an extremely good anti-oxidant. We've included it because we've found it to be a particularly useful anti-oxidant to use in when detoxifying the brain and heart. Take in 100 mg doses. It also helps metabolism, immunity and is helpful for athletes as it can increase endurance.

Phytochemicals – lycopene, bioflavonoid, anthocyanides, chlorophyll:

These are non-essential antioxidants that are also found in fruit and vegetables. Phytochemicals are biologically active compounds, however they are not stored in the body and are not classified as nutrients as life is not dependant on them. They do play vital roles in the health of the body though. For example, lycopene, which is found in tomatoes, is a powerful antioxidant that has anti-cancer properties.

If a need for Anti-oxidants comes up on the software a good regime to take is the following:

200Mg/day Co Enzyme Q10.

500 Mg/day Hawthorn Berry (Crataegus oxyacantha)

1000 Mg/day Calcium Ascorbate

Recommended daily dose of Halibut Fish Oil as a source of Vit A.

1000 iu's of Vitamin E/day.

B Vitamins

B-complex: B1, B2, B3, B5, B6, folic acid, biotin, B12

B Vitamins are water-soluble and are needed on a daily basis. Collectively, they have many roles in keeping us healthy, such as immunity, hormonal balance, circulation, energy production and stress regulation. Many B Vitamins are made in the small intestine and in general can be helped by Energetic Integrator 3, the Stomach Driver and also the emotional stress release formulae. However absorption can be helped more specifically in the following manner:

B1 - Skin Diver with Field Integrator 9

B3 - Stomach Driver, Field Integrators 3 and 8

B6 - Cell Driver with Field Integrator 3

B12 - Stomach Driver with Field Integrator 11

B Complex - Emotional Stress Release with Field Integrator 3

In the following doses:

6 drops a day of the specific Energetic Integrator

6 drops every 5 days of Stomach driver

6 drops a day of the emotional stress release formulae

Oxygenation of blood

Oxygen is absolutely essential for all life processes, including cell metabolism, elimination of toxins and hindering growth of foreign organisms (parasites, pleomorphic organisms, viruses and bacteria). Therefore, improving the oxygenation of the blood can help in many ways, not least in increasing general energy. Optimizing energy compartment 2, iron levels, B12 and the Lung Driver will all help in increasing oxygen blood levels.

6 drops a day of Energetic Integrator 2

6 drops every 3 days of the Lung Driver

Increase Iron and B12 levels

Metabolism

i) Fat Detoxification

This tests for the part of the body-field concerned with helping the liver cells to break down and metabolize fats that have been affected by external environmental factors. These include plastic residues, hormonal broadleaf sprays and certain dioxins that are released into the air by industry. The remedy has been designed to help people who find that they cannot lose weight, even through dieting, as this points to an incorrect functioning of the liver cells.

It is helpful to take a preparation of vitamins A, C and E, the fat-soluble vitamins, to assist the process of detoxification of fatty tissues. Also best used with the Triglyceride remedy.

Energetic Integrator 8 (for the liver) and 12 (for the pancreas) may be used in that order to further assist the fat metabolism recovery. Later on, Energetic Integrator 10 may be used for circulation, if this is obstructed by fatty plaque. If the kidneys become congested, Energetic Integrator 6 can be used last of all.

6 drops every 3 days increasing to every day upon tolerance

ii) Triglyceride Detoxification

Triglycerides are the fats in the nervous system that are formed from three fatty acids and glycerol. Fats are extremely important for the correct functioning of the body, and if there are problems with the formation of these fats, it may lead to mistakes in the performance of the nervous system. Organophosphates present in the environment are able to find their way into these fats, and can cause chaos within the body-field.

The Triglycerides remedy may also address problems related to stress, craving for fatty foods and binge eating. Use with the Fat Detoxification remedy for best results.

Avoidance of low quality fats, and cheap vegetable oils in particular, is advised. We recommend eating foods that are rich in essential fatty acids and minimising cooked fats wherever possible.

There may be experience of thirst, with the need to drink more fluids, and it may also cause temporary loss of appetite. The effect of this preparation will be enhanced by the use of Energetic Integrators 8 and 12. Those with circulatory obstruction due to immobile Triglycerides will benefit from Energetic Integrator 10. Energetic Integrators must be used in the order above.

6 drops every 3 days increasing to every day upon tolerance

Base Rate Metabolism (BMR)

This is a metabolic field test for those whose metabolism may be affected by the environmental toxins that affect the function of the cells of the body, the liver, and the thyroid and pancreas. The remedy has been designed to stimulate the fields related to the function of the organs that cease to work efficiently when there is low level viral disease and hence maybe helpful to those suffering extreme fatigue. It has been created to help create energy for the very weak.

This test shows that the body is heavily laden with toxins both metabolic and environmental and the remedy has been designed to give a direct correction. Its main use is to help generate energy following taking the Environmental Toxin medicine, the general one. It may help to get the normal metabolism going again. This remedy has not been designed for weight loss of which the Fat Detoxification and Triglyceride remedies are more suitable.

BRM 5 drops only once a day

pH or acid alkaline balance of the body fluids

This test may come up when there are diseases like gout or gouty arthritis present, and the correction so far as it is possible is done by the activity of the liver, represented by the Energetic Integrator 7. However there being two poles in this continuum, the Energetic Integrator 12 has to be used as well. By correcting these two fields it is left up to the body mechanisms to arrive at the correct pH.

Carbohydrate Metabolism

This metabolic function also takes two poles to correct, these being the Energetic Integrator 3, for the Small Intestine, and Energetic Integrator 12 for the pancreas

and stomach. They should always be used together when correcting carbohydrate metabolism.

Glucose Metabolism

This is not the test for blood sugar regulation, but for the actual efficacy of glucose metabolism within the body cells. We have found it to be impeded by the environmental pollutants Dioxins and Allethrins, which should be treated as well if the glucose metabolism is not correct. Energetic Integrators 7 and 12 may be used as regulators for glucose metabolism.

Protein Metabolism

Protein Metabolism takes place in the Small bowel and the Liver. Energetic Integrators 3 and 7 can be used for this function. The function of the Small Intestine is upset by the presence of Chlorpyrifos.

Blood Sugar Regulation

This tests for blood sugar regulation, however that does not necessarily mean it is a test for Diabetes Mellitus as there are many things that can upset blood sugar regulation. It is also worth looking at other things that can upset the pancreas and liver like Broad Spectrum Virus, Fungicide and Radiation tests, which can be found on the Environmental screens.

For a direct treatment of pancreatic and liver functions , use Energetic Integrators 8 and 12.

Enzyme Creation and functions

These are related to the brain function with its many Neuro transmitters, as well as the state and activity of the thyroid and mucous membranes generally. Environmental chemicals may be responsible for the malfunction of these enzymes, and in particular our research shows that Butanol's, Dioxins and Fungicides are culpable. These should be treated first if they show up in the tests, followed by Energetic Integrators 4 and 9, together with the Nervous System Driver.
